

SAGAR SHARMA

8439642874 | [GITHUB](#) | [LINKEDIN](#)

Results-driven Software Development Engineer with over 3 years of experience in programming (C, C++, Python) and tools (Power BI, MS Excel, Azure Data Factory). Proven track record in developing, testing, and deploying software solutions.

SKILLS

PROGRAMMING LANGUAGES	C, C++, Python, Golang
TOOLS / PLATFORMS	VS Code and Studio, Power BI, Azure Data Factory, Power Apps, SSMS
DATABASES	SQL

EXPERIENCE

ACCELYA | ENGINEER II - SOFTWARE DEVELOPMENT

Pune | Sep 2022 - Present

- Gained hands-on experience with operating systems, C++, JIRA, and GIT.
- Skilled in verifying and deploying programs and systems.
- Adept at troubleshooting, debugging, and upgrading existing software to enhance functionality and performance.

MAQ SOFTWARE | Assoc. SW ENGINEER - SW ENGINEER I

Hyderabad | March 2021 - Sep 2022

- Generated insights and reports using Power BI and SQL.
- Developed database objects (tables, views) in SSMS and managed ETL in Azure Data Factory.
- Designed, implemented and tested software on modern platforms, including Azure and Power BI.
- Analyzed and implemented customer requirements to develop, test, and deploy software applications.

EDUCATION

LOVELY PROFESSIONAL UNIVERSITY
B.TECH COMPUTER SCIENCE AND ENGINEERING
GPA: 8.5

July 2018 - June 2022
Jalandhar

PROJECTS

INVOICE MANAGEMENT SYSTEM

Flask, SQLAlchemy, Playwright, HTML, Jinja2

- Developed Invoice Management System with secure login, dynamic invoice generation, and real-time functionality.
- Integrated inventory management for adding, updating, and deleting products with instant stock alerts to prevent invoicing errors.
- Implemented an efficient invoice search functionality, allowing retrieval by customer number or date.
- Created sales history reports with date-range filters.

HOME SECURITY SYSTEM

Python, R-pi

- Developed an anti-theft home security system for the All India Research Championship held at IIT Bombay by Teach-Tech Service.
- Utilized Raspberry Pi and Python to create a system that sends a message, call, and photo to the user if unauthorized entry is detected.

FACE RECOGNITION WITH GUI PROJECT [GITHUB](#)

Python, OpenCV, Listdir

- Developed a face recognition and detection system using OpenCV and Python.
- Created a user-friendly GUI for ease of use.
- Trained the model by capturing multiple pictures and performed testing using additional Python libraries such as numpy and listdir.
