WORK EXPERIENCE

AKARMAXS TECH | SOFTWARE DEVELOPER

Bangalore | May 2024 – Present

- Developed and maintained multiple microservices such as **User Service**, **Booking Service**, and **Payment Service** using **Node.js**.
- Implemented **JWT**-based authentication and authorization across all microservices for secure access control.
- Created **RESTful APIs** for user registration, login, booking management, and payment processing.
- Handled secure user authentication with **OTP**-based password reset functionality.
- Designed and implemented booking workflows, including creation, confirmation, and cancellation.
- Integrated **Razorpay** for secure payment processing, managing both success and failure scenarios.
- Set up global error handling using **GlobalExceptionHandler** to manage application-wide exceptions.

RHIBHUS INFOSYSTEMS PVT LTD | ASSOCIATE SOFTWARE ENGINEER

Bangalore | Jan 2022 – April 2024

- Collaborated with a team to define, design, and ship new features.
- Designed, developed, and maintained web applications on both the front-end and back-end using frameworks like **Node.js**, **Express.js**, and **Java**.
- Designed and optimized database schemas, wrote queries, and ensured data integrity.
- Tested code, identified and fixed bugs, ensuring that applications functioned correctly.
- Utilized version control systems such as **Git** to manage and collaborate on code repositories.
- Participated in daily scrum calls for efficient project management and timely software delivery.

EDUCATION

Bachelor of Engineering

Visvesvaraya Technological University | Bangalore

ELECTRICAL AND ELECTRONICS

2017 - 2021 (7.6 CGPA)

SKILLS

Programming Languages: JavaScript, C/C++

Libraries/Frameworks: Express.js, Node.js, Tailwind CSS, **React.js**
