PROFESSIONAL SUMMARY

Skilled data engineer with hands-on experience in data transformation and processing within the retail domain. Proficient in leveraging Azure technologies, including Azure Data Factory, Azure Databricks, and Azure Synapse, to develop robust data pipelines and optimize Spark performance. Demonstrated expertise in PySpark, Spark SQL, and various data formats such as CSV, JSON, and Parquet. Proven track record of enhancing data analysis capabilities and contributing to informed decision-making. Globally Certified Azure Data Engineer Associate and Databricks Accredited Lakehouse Fundamentals. Seeking opportunities to apply and expand skills in a dynamic, growth-oriented environment.

SKILLS

- Programming : Python, SQL
- Cloud Services : Microsoft Azure Cloud, Azure Data Factory, Azure Synapse, ADLS gen 2, Azure key vault, Azure Databricks, Azure Functions
- Data Processing : PySpark, Apache Spark, Databricks
- Relational Database : SQL Server, MySQL, Oracle Database
- Other Skills : ETL Pipeline, Data warehouse, DevOps, Git/GitHub /GitLab, Data engineering, Data analysis, Big Data, Apache Hadoop, Linux, Power Bi

INTERNSHIP

(06-2024)

Project : Customer Segmentation and Data Transformation & Processing (Retail Domain)

- Executed complex data transformation tasks on retail domain data using PySpark within Azure Databricks and Azure Data Factory (ADF).
- Designed and implemented processes to convert raw data into well-structured, analytical datasets.
- Enhanced data analysis capabilities, aiding in informed decision-making and generating actionable business insights.
- Proficient with technologies such as Azure Data Factory, PySpark, Spark SQL, Azure Databricks, and Azure ADLS Gen2.
- Engaged in daily stand-up meetings to update the team on task progress and resolve any blockers.
- Leveraged technical expertise in PySpark to address and solve routine data engineering challenges.
- Managed and processed various data formats, including CSV, JSON, and Parquet files.
- Developed data frames and established Delta tables to streamline data management and access.
- Applied PySpark and Spark SQL for data cleansing, anonymization, and aggregation in line with business requirements.
- Built and sustained data pipelines using Azure Data Factory to ensure efficient data flow.
- Utilized Azure Databricks for sophisticated data processing and transformation tasks, employing PySpark for optimal performance

Tools used:

- Resources: Azure SQL Database, Azure Data Factory, Azure Data Lake Storage, Databricks, Azure Key Vault
- Modules: PySpark, ADF

EDUCATION

Bachelor of Commerce, 2024

Dr. Babasaheb Ambedkar Marathwada University – Aurangabad

CERTIFICATIONS

- **Microsoft Certified: Azure Data Engineer Associate**
- **Databricks Accredited Lakehouse Fundamentals**

PERSONAL DETAILS

- Date of Birth: 21 January 2001
 - Marital Status: Unmarried
 - Gender: Male
 - Languages: English | Hindi | Marathi
- Nationality: Indian
