SUMMARY

I am an IT Engineer with over 14 years of experience in programming, AWS Cloud DevOps, networking, server administration, and more. I am committed to leveraging my skills for challenging opportunities in IT. My roles have included positions where I've improved system performance through AWS architecture, project management in Agile environments, and executing automation with a variety of DevOps tools. I am skilled in Python, C# .Net, and various cloud technologies.

EXPERIENCE

Cloud Engineer

Freelancer Cloud Automation

07/2024 - Present Chennai, India

Company Description

- Managed over cloud projects simultaneously, utilizing diverse AWS services and tools.
- Reduced system downtime by 40% by implementing proactive monitoring and alerting solutions.
- Achieved a 25% increase in team productivity by automating repetitive tasks using Ansible.
- Managed virtual servers using Amazon EC2, supporting large-scale enterprise operations.
- Established efficient CI/CD pipelines, reducing deployment times by 40%.
- Configured and maintained a network consisting of 100+ EC2 instances.
- Achieved 99% uptime for cloud services by implementing automated monitoring using Grafana and Dynatrace.
- Integrating AWS services with Kubernetes for scalable solutions.
- Designed and developed bots using Automation Anywhere to automate key business processes, achieving [specific outcomes, e.g., "a 30% reduction in processing time"].
- Led training sessions on RPA tools for [team size], ensuring effective knowledge transfer and adoption.
- Worked with IT and business teams to integrate bots with third-party systems via APIs and SQL databases.
- Developed error-handling mechanisms and implemented best practices for bot development.
- Designed reusable bot templates to accelerate development and ensure scalability.
- Monitored bot performance, resolved production issues, and implemented updates to maintain efficiency.

RPA & DevOps Engineer

Hewlett Packard Inc

09/2022 - 04/2023 Chennai

Hewlett Packard Inc provides various IT and hardware solutions.

- Looked constantly for development as well as continuous improvement for the entire team
- Worked closely with IT to ensure that applications support continuous improvements around quality, cycle time, and operating efficiency.
- Created project plans, scope documents, schedules, and forecasts. Provided timely communication on the impact of changes and decisions
- Developed best practices and tools for project execution and management
- Worked with management to identify and address issues impacting projects
- Managed software project teams using Agile SCRUM practices to develop Windows-based applications using C# and .Net for mass spectrometer products
- Resolved project issues, mitigated risks, and managed scope change requests for all development sprints
- Written Bash and Python scripts integrating Boto3 to supplement automation provided by Ansible and Terraform for tasks like EBS volume backing AMIs and scheduling Lambda functions for routing AWS tasks
- Acted on items identified in retrospectives and implemented process improvements in future sprints for continuous improvement
- Provided project progress reports to project team, stakeholders, management, and executives
- Migrated infrastructure, data applications out of legacy into cloud and hybrid environments
- Automated operations of virtual environments through scripts
- Migrated applications from on-premises to AWS cloud, developing custom scripts utilizing AWS Services like EC2, S3, Lambda functions
- Developed automation code for building 100+ pipelines, Kubernetes clusters, and cloud infrastructure, maximizing efficiency, performance, and security
- Built and managed S3 buckets and used Glacier for storage and backup on AWS
- Experienced in architecting and configuring secure cloud VPC using private and public networks through subnets in AWS
- Implemented and automated solution on AWS Cloud via Jenkins pipeline, Terraform, Cloud formation
- Reduced incident response time by 30% by implementing automated monitoring and alerting systems.
- Managed 15+ AWS services across multiple projects for a cumulative infrastructure.

EXPERIENCE

Cloud Developer

SITAS Pioneer NDT

📅 01/2022 - 09/2022 📍 Coimbatore

SITAS Pioneer NDT specializes in non-destructive testing services.

- Acted as the technical project manager with overall responsibility for product development projects
- Assisted IT Project Manager to develop documentation, software work plans, and keep documentation up to date
- Worked with project management office to utilize Concurs standard project management and agile methodologies
- Managed multiple projects simultaneously and assist IT Project manager in estimating completion dates and resource allocation
- Proficiency in decision and issue Management, Software risk management, Software Engineering management, and Software Engineering process
- Managed project schedules, costs, quality, issue & risk management, communications, and other PMI project management functions
- Provided day-to-day guidance and oversight of team activities
- Maintained monitoring profiles for AWS Services - EC2 Parameters
- Proficient in tools like Putty, S3 browser, Bucket explorer
- Launched and configured Amazon EC2 Cloud Servers and configured for specified applications using Jenkins
- Maintained the User Identity Access Management (IAM)
- Configured Users and Groups policies and permissions
- Knowledge in configuration of GIT/GITHUB
- Used GitHub for creating a repository and uploading files
- Handled Docker Containers by configuring docker Files
- Handled Docker HUB, creating Docker Images and Docker Compose
- Maintained and monitored the Application/Servers using Prometheus and Grafana
- Worked on Ansible to manage Web applications
- Handled installation and configuration of Web Application servers Apache, Tomcat
- Awareness of networking and internet protocols, including TCP/IP
- Implemented ACL configuration for users & groups
- Troubleshooting LAN/VPN issues
- Maintained, monitored, and troubleshot network infrastructure

Systems Engineer

AVC

📅 04/2016 - 12/2021 📍 Chennai

AVC is involved in various technology-oriented services.

- Configured and maintained AWS services such as EC2, S3, RDS resulting in performance improvement
- Provisioned highly available ec2 instances using Terraform and Cloud formation
- Managed infrastructure as code using Terraform
- Implemented automated scripts of cloud related tasks
- Troubleshoot and resolved complex cloud infrastructure issues
- Installed and configured Linux with Apache, Oracle 8i and PHP
- Maintained and resolved issues on LAN/WAN and other computing devices
- Hands-on experience in Windows Server 2012, installing and configuring server roles

Network Support Engineer

Anziyan Tech

📅 01/2011 - 03/2016 📍 Trichy

Anziyan Tech provides networking solutions and support.

- Providing Remote Support and Troubleshooting assistance to Enterprise clients of Aruba Networks
- Working with high reference accounts and assure timely delivery of support and service
- Handling escalations from Tier1 and resolving issues
- Coordinating between the Developer team and end customers to fix software-based bugs
- Taking remote access on end customer equipment and assisting with troubleshooting issues
- Worked on Aruba Access layer (L3) switches
- Configuring Stacking, Poe power setting, GRE tunnelling
- Upgrading, configuring, designing networks topology for Aruba Mobility Controller's and Access points
- Worked with cloud services for integrating the Access point globally

EXPERIENCE

Hardware Engineer

MMinfomedia

12/2008 - 07/2010 Chennai

MMinfomedia provides hardware and software maintenance services.

- Troubleshooting hardware and software problems
- Configure network printers and solve related issues
- Manage the windows server Netback up software installation and configuration
- Helpdesk ticket response, resolving issues
- Troubleshooting hardware problems for internal and external clients
- Configure and install hub, unmanaged switches, and routers

EDUCATION

Master of Science in Software Engineering

Anna University

07/2003 - 11/2008 Chennai

CERTIFICATION

AWS Cloud Practitioner Essentials

AWS Training Online-Nov 2024

PROJECTS

Traffic Light Automation Deployment Projects

Deployment projects focusing on automation

- Deployed Traffic Light Automation using SAP

Panorama App

Panorama app- streaming data processing

- Data ingestion, transformation and storage via AWS IoT Core and Amazon Kinesis

Short Message Services

Short Message Services using AWS

- Used AWS Cloud SNS for encryption and messaging services
