EXPERIENCE

Project - Nortura (Capgemini)

Project Description: Nortura is a Norwegian agricultural cooperative that operates slaughterhouses and other processing plants related to meat and eggs.

Tasks/Achievements:

- Managed and resolved issues/queries based on ticket priority and SLA time.
- Collaborated with end-users to gather requirements and implement necessary changes.
- Handled change requests, problem tickets, incidents, SRs, EDI environment, and technical-functional documentation.
- Troubleshot technical issues, documented actions and resolutions, and managed queues, XI messages, and XML reprocessing.
- Conducted daily batch job monitoring, log management, and maintained customization and enhancement documentation.
- Led development activities for change requests, including IDoc testing, reprocessing, and analysis.
- Provided solutions via email, Teams, and calls in response to user tickets.
- Experienced in OTC processes, including intercompany STO, sales, returns, contracts, pricing, and billing.
- Worked with IDocs and interfaces (API, CPI), documenting functional designs, test cases, and results.
- Managed sales orders, delivery scheduling, outbound delivery splits, and free-of-charge delivery customizations.

Client - Bayer AG(Capgemini)

- Customized customer and material master data, ensuring data sharing across sales organizations.
- Configured the OTC process, including inquiry, quotation, sales orders, deliveries, billing, and accounting integration.
- Set up credit and debit memo requests with workflow based on value.
- Customized condition types for pricing, discounts, surcharges, freight, and taxes.
- Configured delivery processing, including picking, packing, batch determination, and shipping/storage location determination.
- Configured master data fields for customer and sales document types, item categories, schedule line categories, and customer material info records.
- Defined pricing procedures, including condition tables, access sequences, and pricing determination.
- Configured automatic credit management and ATP checks at sales order level.
- Set up functions like partner determination, material determination, free goods, and revenue account determination.
- Supported special business processes such as third-party sales, consignment, and STO.
- Provided post-go-live support, user manuals, and end-user training.

Company – Hi-Tech Radiator

- Experienced in inventory management, material handling, and logistics, including verifying stock statements, transferring non-moving materials, and managing expired/rejected goods.
- Proficient in SAP for shipping point, route, transport, and delivery scheduling, ensuring timely processing of deliveries and invoices. Skilled in material availability review, MRP runs for material shortage, and vendor communication for timely deliveries.
- Expertise in goods receipt (GRN), material reservations, transfers, and using vendor portals for ASN, barcode generation, and EDI management.
- Ensures smooth operations through effective coordination with suppliers, transporters, and internal teams.

Company – Micro Turner

- Handled end-to-end quote-to-cash processes like Enquiry, Quotation, Sales Order, Order Confirmation, Delivery, and Billing.
- Maintain Customer Master Data and Pricing Master Data.
- Prepared the PPC (Production Planning and Control) followed by the Make to Order Process.
- Create Proforma and Invoice.
- Follow up with B2B and B2C customers for Order confirmation and Payment.
- Analysed sales performance through reports.
- Participated in cross-functional meetings for process optimization.

SKILL

- SAP configuration and customization
- SAP system integration and interface development
- SAP report and query development
- SAP user role and authorization management
- Cross-functional collaboration and communication & Team coordination.
- Troubleshooting and problem-solving
- End-user training, support, Time management and prioritization
