SKILLS

- **Technical Skills:** Flutter Framework(Android, iOS, Web), Dart Language, Firebase, Database Design, Git, GitHub, Version Control, XCode, Android Studio, VS Code, Prompt Engineering
 - **Languages:** English, Kannada, Hindi
 - **Other Skills:** Communication, User Requirements, Project Management, Jira
-

WORK EXPERIENCE

Flutter Developer, LorryCircle (Full Time, WFO) **Aug 2024 - Present**

- Contributing to the development of LorryCircle app for Android(20k+ users) & iOS by making use of Providers for State Management.
- Dealing with WebSockets Client(SpringBoot Stomp), RazorPay Payment Gateway & Transactions, Google Maps and Responsive UI development.

Flutter Developer, Farmkal LLP (Freelance) **Apr 2024 - Aug 2024**

- Working on developing and maintaining the mobile app conducting business related to Agri and Farm equipment. It is an e-commerce model for Agri based regions in India.
- I am also helping with designing the MongoDB database.

Flutter Developer, Nexenstial LLP (Full Time, WFO) **Apr 2023 - Apr 2024**

- I was given the responsibility to Design, Develop and Maintain various mobile apps for multiple institutions and client projects.
- Was involved in user testing of the apps at this startup company.
- Developed 15+ apps for the company's clients(Ayurvedic Colleges and Nationwide Universities) and worked on 1 client project which involved managing visitors and meeting room bookings at a renowned 'co-working space' company.

Flutter App Instructor, Nexenstial Placements (Full Time, WFO) **Nov 2023 (1 month)**

- I was tasked with training 40+ engineering students under an internship program at the Nexenstial Placements. By the end of the program, all students were capable of developing apps using Flutter framework.
- This program helped me improvise my skills and helped me with my coding practices.

Flutter App Developer, Catalyst Reachout (Student Community, Apprentice) Nov 2022 - Feb 2023

- Worked on an app called 'It Repeats' (now discontinued) which was meant to help students at KLE Tech University with accessing exam question papers in an organized manner.
- I got the opportunity to understand many basic concepts related to app development such as State Management(Flutter BLoC), Clean Code Architecture, SOLID Principle, documentation, responsiveness(multi-screen support) and many more.

Student Intern, Knit Space **Jun 2022 - Feb 2023**

- Worked with python language, where I was more oriented towards research for implementing new ways to recommend search results on a search engine.

PROJECTS

Bell App (2022)

- My First app built on my own without having to refer any resources.
- This app uses the mobile device's in-built accelerometer to detect movement to play a 'bell sound' upon movement.

Personify App (2022)

- My second app as a developer. This app was the first time where I used a public weather API to learn API integration, basics of asynchronous programming and basics of app state management.

It Repeats (2022 - 2023)

- Worked and collaborated with a group of Full Stack Developers to contribute to this open source project for helping university students to access question papers.
- This was a great opportunity as I was given guidance to learn Flutter, Firebase and other related concepts. Although, this project has been discontinued due to lack of maintenance.

College Management Service App (CMS), (2023 - 2024)

- Designed, Developed and Maintained the CMS (Student) apps for 10+ educational institutions (Mainly colleges) with 15+ apps, collectively having 10k+ users.
- All apps were customized for each college with separate APIs for data management with Push notifications to notify users.

University Management Service App (UMS), (2023 - 2024)

- Similar to CMS, this app was directed towards 3+ universities with multiple colleges under them.
- All the apps collectively had at least 5k users, to my knowledge.

2gethr App (2023 - 2024)

- This was a client project for a renowned Co-working Space Company based in Bengaluru.
- I was assigned the task to develop the UI and logic for Visitor Management Section in the app which involved displaying, accepting, declining and registering visitors for a specific users.
- Coordinated with 2 backend developers to develop features in the app.
- Created and Maintained documentation for features in the mobile app, iPad app and the web admin portal.

FarmLX (Freelance, Farmkal LLP) (Apr 2024 - Aug 2024)

- Currently working(remotely) on the mobile app for Farmkal LLP based out of Jaipur, Rajasthan.
- Using my knowledge of Flutter to craft highly responsive and engaging UI to bring the idea to reality.
- Contributed to this project by re-developing the entire app UI and re-designing the project's entire Database.

LorryCircle App (Aug 2024 - Nov 2024)

- Upgraded entire mobile codebase from 2022 version to latest 2024 version successfully.
- Integrated custom deeplinking and replaced Firebase Dynamic Links successfully.
- Integrated Stomp WebSocket for Live Notifications.
- Brought down Open Jira issues from 150+ to below 20 after Quality Assurance Tests.
- Also fixed the app's iOS build with latest dependencies and functionalities.
- Made significant UI improvements and feature additions.
