Hyderabad

SUMMARY

Azure Data Engineer with proven expertise in **designing, implementing, and optimizing data solutions** on **Microsoft Azure**. Proficient in **Azure Data Factory, Azure Databricks, Azure Synapse Analytics, and Azure SQL Database**, with extensive experience in **data pipeline development, ETL processes, data warehousing, and big data processing**. Demonstrates a strong understanding of **data security, performance tuning, and automation**, delivering **scalable and reliable data solutions** to support **business intelligence and analytics**. Passionate about leveraging **cloud technologies** to enable **data-driven decision-making** and uncover actionable **business insights**.

EXPERIENCE

10/2024 - Present

Hyderabad, Telangana, India

Technology Analyst

Infosys

Analyzed and implemented technology solutions, working closely with stakeholders to drive innovation and enhance business intelligence capabilities

- Performed **ETL actions** to segregate and integrate data from multiple sources, including **Dynamics, OMS, Oracle, MDM, Flint Fox, and HRC**, utilizing the **Lakehouse framework** to streamline data processing and ensure efficient data management.

10/2023 - 09/2024

Hyderabad, Telangana, India

Senior System Engineer

Infosys

Led the development and optimization of system architectures, managing large-scale data operations and improving system performance and scalability

- Developed a Synapse framework** to integrate **Dynamics Common Data Model (CDM)** into the **data lake** using **Synapse Link**, enabling seamless data transfer from **Dataverse** to the data lake. This approach enhanced data accessibility and consistency, improved processing speed, and mitigated issues related to multi-datatype handling, ensuring efficient data processing and reduced complexity.
- Automated Success and Failure Notifications** using **Azure Data Factory (ADF)** by designing and implementing an email notification pipeline to provide real-time updates on data pipeline statuses. This included alerts for both success and failure events, ensuring proactive monitoring, timely interventions, and significantly reducing data processing downtime.

07/2021 - 09/2023

Hyderabad, Telangana, India

System Engineer

Infosys

Worked on the design, implementation, and maintenance of infrastructure systems, ensuring high availability and reliability for data-driven applications

- ETL & Data Mapping:** Independently created **Informatica mapping documents** for **Teradata** (dimension and fact tables), consolidating complex queries and applying transformations. Successfully loaded data into **Azure Synapse Analytics**, optimizing data flow and enhancing data accessibility for analytics.
- Scheduling & Real-Time Processing:** Worked with the team to design a scheduling framework with dependent jobs, enabling near real-time data processing.
- Ingestion Frameworks:** Designed and implemented robust **ingestion frameworks** for diverse data sources, including **file servers (AWS S3, OMS), Dataverse, Teradata, and Azure SQL**. Established **source-level schema mapping** for Dataverse to ensure **data integrity and consistency**, seamlessly integrating raw data into **Delta Lake** for advanced processing and analytics.
- Delta Lake & Autoloader:** Leveraged **Autoloader** to efficiently ingest raw data into **Azure Data Lake Storage (ADLS)** as **Delta tables**, handling diverse file formats such as **Parquet, JSON, ZIP, and XML**. Ensured seamless integration across multiple data sources, enabling reliable and scalable data pipelines.
- Data Transformation:** Transformed **raw data (Bronze)** into **structured (Silver)** and **curated (Gold)** layers using **Databricks notebooks**, ensuring accurate **data transformation, validation**, and readiness for downstream analytics.
- Monitoring & Auditing:** Established **audit logs** to track **data processing activities**, delivering actionable insights for **reporting and monitoring teams** to ensure transparency and system reliability.

SKILLS

Azure Data Factory	Azure Data Lake	Databricks	Pyspark	SQL	Data Warehousing	Azure synapse
Azure SQL	ETL Development	Logic Apps	CI/CD			

CERTIFICATION

Microsoft certified azure data engineer associate

Microsoft

Microsoft Certified: Azure Data Fundamentals

Microsoft

Microsoft Certified: Azure Fundamentals

Microsoft

Infosys Certified: Spark Professional

Infosys

EDUCATION

07/2017 - 06/2021

- Bachelor of Engineering - BE, Information Technology
Chaitanya Bharathi Institute Of Technology
