

Sandeep Sahoo

+917856857977 | sandeep.savethem2@gmail.com | KA

Summary

Passionate Blockchain Specialist, who's into this space since a very long time, knows every side of blockchain, Web3.0 Development, GraphQL, **Certified with BitcoinSV And Solana Foundation**. Responsible For Training Programmes On Algorand (Blockchain Giant), Aided Blockchain Councils To Implement Better Blockchain Infrastructure, Responsible For Training Programmes On Ethereum, Hyperledger Fabrics, NodeJS Custom RPC Building, Rust Mastery, Redis On Networking Aspect, Built Hundreds Of Javascript Dapps And Protocols.

Resourceful Specialist offering expertise in problem-solving, data analysis and client service. Adept at quickly learning new technologies and processes for driving success. Proven track record of successfully managing multiple projects and developing innovative solutions.

Experience

Nija Venture Impacts Private Limited | Bangalore, Karnataka

Blockchain Specialist | 06/2022 - Present

- **As a certified blockchain specialist**, my role in Nija is to build a better solutions for clients, I'm expert in both Hybrid and decentralized chains, I know how to build infrastructure for Blockchains or products, I know the networking aspect to scale existing L1s or L2s, I also built Training contents for Xfinite (Algorand), I built hundreds of Dapps, security audits, tokenisation models, Better Investment Analytics Platform, And Much More
 - Collaborated with cross-functional teams to achieve project goals on time and within budget.
 - Improved customer satisfaction rates through proactive problem-solving and efficient complaint resolution.

Savethem India Foundation | Mumbai, Maharashtra

Director (Cybersecurity And Blockchain Specialist) | 03/2020 - 03/2022

- As the **Director for Savethem**, I used my cybersecurity (cryptography side) along with Blockchain side to aid many state police, I filed 3 successful petitions in Supreme Court, Cracked Down Illegal Chinese Loan Apps In India, I was featured in many publications, Channels and even web series: Money Mafia by Discovery +
 - From cryptography aspect I know how to decrypt certain hashes which were used to be in Tor Networks and which were compromising data of some sensitive informations, cracking down the DNS and getting reverse engineering skills to decrypt in Money laundering happening in Chinese apps which used crypto currencies.

Skills

Network Designing, Javascript, NodeJS, Rust, Scrypt, Solidity, Golang, Hyperledger, R3 Corda, Mean/Mern Stack, GraphQL, Redis, Python, MongoDB, BigchainDB, AWS, Ubuntu, Three.js, Moralis, Motoko Language, Chainlink Oracle, Geth etc, Bitcoin Core, Distributed Systems, Algorithms, Dynamic Programming, C++, Docker, Kubernetes, Apache Kafka, Apache Cassandra, Tensorflow, Keras, Pandas, NumPy, Cryptography, Redis, CI/CD, Expert Problem Solving, SQL, Software Development, Scripting, Systems Analysis, Analysis Skills, Angular, AI, Quantitative Analysis, Quantitative Research, Web Services, REST, Regression Analysis, Routing Protocols, Root Cause Analysis, Research & Development, Remodeling, React.js, Terraform, Unit Testing, Information Technology, OpenStack, Oracle EBS, Objective-C, PostgreSQL, Product Lifecycle Management, Design Patterns, Data Analysis Skills, Debian, Git, GitHub, Go, gRPC, GitLab, HTTPS, JSON, Linux, LAMP Stack, XML, C#, Bootstrap, Big Data Analytics, NoSQL, Microsoft Word, MySQL, Market Analysis

Education

Trident Academy Of Creative Technology

Computer Applications | 06/2020

A.A.E.S (ISC Board)

05/2017

Dayanand Public School (ICSE Board) | Jamshedpur, Jharkhand

06/2024

Completed My Class X From ICSE Board

Languages

English, Hindi, Oriya, Kannada

Certificates

Certified From BitcoinSV Foundation, Certified From Solana Foundation

Leetcode Profile

<https://leetcode.com/u/Sandeepkmmr/>

Projects

Aave V3 FlashLoan With Dodo Implementation: I built DeFi Based Zero Collateral Flash Loan Script with Implementations of Dodo, To use Arbitrage Difference, as Aave takes its commison and Eth Gas is expensive, thus the protocol also listens to the Relayers.

DeFi Protocol Smart/Contract ABI Analysis: As we all know there are a lot of rug pulls happens in this space and not much people can afford the expensive security audit firms thus to help both individuals and enterprises, I built Smart Contract Analysts tools.

SubDao the better micromanagement: I built one particular product on the concept of subdao to sub information aspect OHCL from Live Oracle: Building Quantitative Trading Platform For Crypto Analysis And Investment indications On DeFi protocols.

Founded my own Technology: Distributed Finance (Distributed Finance) which solves the compliance issues faced by many protocols.

Accomplishments

Success in delivering industry standard blockchain projects, through my expertise in blockchain and critical thinking nature, i built many projects even POC for clients, on Leetcode, i solved the most difficult problems which had lowest acceptance rate.

- Built my own quant trading bot which incorporates blockchain oracles, advanced candlestick patterns, machine learning models, CNN, LSTM, Random Forest with more than 92% Accuracy For Derivatives Markets, which is focusing on 1Minute Timeframe For Each Trades.
- Built Nija Wallet on top of Metamask which anonimises the initial public address of the user which is protecting uses from MEV And CryptoSweeper Attacks, it also incorporates, ledger logging, KYC/AML solutions for compliance.
- Built Gasless Flashloan Arbitrage Using ZKSnark, Advanced Cryptographic Algorithms And Leveraging Technologies Like MetaTransactions, Open Gas Station, DODO And DYDX.
- Built Industry Level: Smart Contract Generator, which generates smart contract for every business type it also includes fractionalisation as well as tokenisation which is now a trend as RWA (Real World Assets)

Interests

1. BLOCKCHAIN
2. QUANTUM COMPUTING
3. NEURAL NETWORKS
4. METAVERSE
5. DISTRIBUTED FINANCE
6. QUANTITATIVE FINANCE
7. TOKENISATION

Hobbies

-
1. Playing Guitar
 2. Crypto Trading (derrivatives)
 3. Cooking
 4. Travelling
 5. Photoraphy
 6. Reading Research Paper From MIT, Standford For New Emerging Techs
