SANDEEP DUBEY

PHONE: +91 9845766994/9379095407 (Cell)

E-MAIL: dubeysandeeep1981@gmail.com

Summary:

Highly motivated and result oriented IT professional, worked as Principal Domain Specialist with over 19 years of experience in the field of Oracle database management, specializing in Oracle Cloud Infrastructure (OCI), Real Application Clusters (RAC), Dataguard, Backup/recovery and database Performance Tuning along with day-to-day DBA activities. Delivered a project of complete data center migration of around 500+ Oracle database with the help of 5 team members. Stabilized multiple issues with the different databases and reduced 1000+ incidents on monthly basis.

Insightful understanding in Private/Public Cloud computing environments like AWS/OCI(IaaS, SaaS and PaaS). Having good understanding on EC2, S3, autoscaling, RDS, VPC etc, working knowledge on same. Also have some experience of managed services in AWS along with Devops part like CI/CD pipeline, automation using terraform, cloudformation etc.

I'm passionate about my work and I know how to get the job done.

I would describe myself as an open and honest person who doesn't believe in misleading other people and tries to be fair in everything I do.

I want to get more progressive and productive in the field of technology to help grow my organization and achieve new heights. Seeking a challenging role to contribute to the success of a dynamic organization.

Skill Set:

Operating Systems	Windows / Linux / Solaris /AIX /HPUX
Databases	Oracle 8i/9i/10G/11G/12C/19C/21C
Cloud Technology	OCI, AWS, Compute, Networking, Storage, Database

Job Experience:

1) Oracle India Pvt Ltd. Bangalore (From 7th Feb 2022 till 7th Nov 2024)

Working as database specialist in Presales team.

Designation: *Principal Domain Specialist* – EMEA

Job Role and Responsibilities:

- Working with different EMEA reason customers to get requirements based on the products.
- Database performance health check for different customer's database.
- DBSAT and database security related to Oracle.
- Doing POCs for different customers.
- Doing presentations for different customers based on the requirement on specific products.
- Helping and troubleshooting customer's RAC and Dataguard related issues and their performance analysis.
- OEM overview demonstration as per customer's requirement along with paid features.
- All the tasks are done on OCI, so I have good understanding of it. Also cracked the OCI Foundation 2024 Certificate recently.
- Troubleshooting and helping customer across EMEA region on Oracle database issues.
- Working experience with Autonomous database.

- Training the new joiners within the team.
- Delivering Oracle webinars on different oracle database topics.

2) DXC Technology (From 15th Nov 2017 till 5th Feb 2022)

Designation: Manager Service Delivery

Job Role and Responsibilities:

- Worked with client onsite called client's database engineering team as a core team member on all critical issues and enhancements.
- Working here as an expert in the field of Oracle database and trying to contribute in each and every core area.
- Handling and heading a team of 10.
- Worked on aged incidents as well to reduce the long runner.
- Worked on outages and critical calls related to the banking system.
- Mentoring new joiners in the team.
- Organizing training sessions for the team.
- Working on all critical and important RCA for the team.
- Working on escalations and complaints raised by users/client.
- Dealing with highly critical high availability RAC systems with multiple nodes on both primary and standby end.
- Creating SOP and knowledge articles to benefit the team from the known issues and best practices.
- Working on incident reduction with BIONIX team.
- Helping application teams on multiple issues, especially performance problem.
- Working with support on critical issues in order to get fixes.

3) IBM India Pvt Ltd (From 10th Feb 2016 till 14th Nov 2017)

Designation: Oracle DBA SME (Subject Matter Expert)

Job Role and Responsibilities: -

- Worked on different migration issues for database including FS level migration, RMAN restore and recover (with and without catalog), cross platform migration from RAC to standalone and using datapump utility.
- Helped team to work on different patching activities including regular PSU application.
- Worked on regular day-to-day activities, weekly refresh using RMAN, schema level refresh using datapump.
- Language conversion of database binaries without impacting the actual data.
- Worked on a corruption issue as well, where a complete 4TB database lost, restored and recovered, provided same to the customer. There were a few corruption issues which were logical in nature.
- Worked on different backup activities.
- Got involved with architect to stabilize the account activities and provided suggestions.
- Heterogeneous migration of databases, where databases came from different server, different platforms and migration on a single server as per client's requirement.
- Worked and did perform troubleshooting for various application and their connectivity issues.
- Worked on different performances issues where proactively suggestion were provided to the customer in order to get rid off from the issue.
- Did work on regular database install and upgrade issues.
- Regular troubleshooting for all kind of database problems.
- Conduct regular session to groom the team on various database topics.
- Managing technical calls and escalation related to Oracle.
- Worked on ASM Disk header corruption issue and fixed it with the ASM Disk header patching.
- Automated the database refresh from Production to Development Environment using Shell Script.
- Completely lead a physical data center migration along with architect.

Note: - I had also taken over 'Client Technical Lead' role where I started working closely with Architects. Direct technical update with the clients along with escalation handling etc with this role. Application level issues handling related to infrastructure will also be done here.

4) Oracle India Pvt Ltd. Bangalore (From 3rd July 2006 till 9th Feb 2016)

Designation: Principal Software Engineer -Global Product Support

Job Role and Responsibilities:

- Worked with Real application cluster team for more than 4 years.
- Handling all kind of RAC issues within the team for all global customers.
- Handling RAC performance and other troubleshooting and administrative tasks.
- Investigating RAC related GCS, GES issues and other locking issues in RAC databases.
- Clusterware installation/upgrade on various platforms.
- Resolving clusterware OUI/DBCA issues.

Job Role and Responsibilities:

- Monitoring different servers of customer across globe.
- Participating in different tasks for database servers, like checking the disk space, monitoring the different maintenance activities.
- Maintenance of different services of customer's servers.
- Working with senior DBA groups in order to resolve all critical issues and maintenance activities.

Prizes/Awards:

Excellence award at DXC was given to restore a table from backup where backup was beyond retention period.

Two Spot Awards and One Kudo received with a short span of period within DXC.
 Be Essential Aware in October 2016 (IBM India Pvt Ltd)
 Star performer award in May 2016 (IBM India Pvt Ltd)
 Be Essential award in September 2016 (IBM India Pvt Ltd)
 RAV (Rapid Visibility) certification in Oracle for content (knowledge management)
 OC (Outstanding Contributor) in Oracle India Pvt Ltd.
 Excellence award in Oracle India Pvt Ltd.

Academics Summary:

DEGREE/CERTIFICATION	UNIVERSITY	PERCENTAGE	YEAR
MCA	R.G.P.V. Bhopal	76.64	2005
B.Sc. Elec.	R.D.V.V. Jabalpur	65.50	2002

Pursuing PG Program in cloud computing from Great Lake University year 2024-2025 ...

Certifications:

I have achieved OCA, OCP and OCM certifications in the field of Oracle database administration. I have also achieved OCI cloud foundation certification.

Hobbies:

Meeting people, going out, long drive, listening to music.

Documents written/authored at Oracle for DBAs worldwide in KM :-

- DBCA Fails To Remove Instance with PRCD-1052:Failed to remove instance from database (Doc ID 1566903.1)
- Message In Trace File: Ksfdstblkini : Skgfrgblkdev Failure : Block Device = (Doc ID 1924695.1)
- Unable To Use Parallel Clause With Data Pump (Doc ID 1277794.1)
- ORA-600 [kkmupsViewDestFro_4] During Merge Statement (Doc ID 1181833.1)
- ORA-600 [kmgs_parameter_update_timeout_1], [1565], Instance Terminated, Can't Startup Using Either Pfile Or Spfile (Doc ID 960080.1)
- Oci-21503: Program Terminated By Fatal Error Oci-04030 (Doc ID 1153740.1)
- LPX-00225 Element Tag Error When Import An Interval partitioned Table Using Datapump (Doc ID 959119.1)
- Import Of A Large Table With A TIMESTAMP Column Is Slow (Doc ID 739241.1)
- High Shared Pool Usage Due To Frequent Add/Exchange Partition Operations (Doc ID 1153795.1)
- Poor Performance Of SQL*Loader On Direct Path Load When Using DATE And CONSTANT Clause (Doc ID 759215.1)
- Tablespace With STORE IN Clause Would Not Change During Import Using REMAP_TABLESPACE With Interval Partitioning (Doc ID 958496.1)
- DBMS_METADATA.GET_DDL Generates Incorrect DDL With UNUSED Columns (Doc ID 737601.1)
- ORA-00600 [kcbkllrba_3] On RAC (Doc ID 818106.1)
