CAREER OBJECTIVE

Results-driven .NET Developer with 4+ years of expertise in enterprise software development, from architecture to deployment. Seeking to leverage full-stack development skills and cross-functional team experience to drive technical innovation in a challenging role.

WORK EXPERIENCE

Senior Product Engineer : Inventurus Knowledge Solutions (March 2023 - Present)

- Using ASP.NET MVC and Web API, I designed a scalable healthcare platform that manage the patient's data with 99.9% uptime.
- C# and Entity Framework were used to design a high-performance backend, creating intricate stored procedures and optimizing data access patterns.
- Developed a RESTful services architecture with strong caching and error-handling features for effective data transfer. Created responsive client apps that combined TypeScript with specific healthcare data elements.
- Created automated healthcare workflows that cut down on care managers' manual labor by 40%. Incorporated role-based access control, thorough audit trails, and safe, HIPAA-compliant data management.
- N-tier design was implemented using DRY principles, and by optimizing database and API patterns, system response time was decreased by 30%.
- **Tech Stack** C#, ASP.NET MVC, Web API, SQL Server, Entity Framework, RESTful Services , HTML5, CSS3, TypeScript, JavaScript, jQuery , Azure Pipelines with CI/CD, 95% unit test coverage.

Software Engineer : Hexaware Technologies (May 2022 - Feb 2023)

- Developed and deployed Sitecore solutions to satisfy business needs while guaranteeing scalability and high performance.
- To facilitate the display of dynamic content and improve user experience, reusable components such as renderings and sub-layouts were created.
- Workflows and templates were created to help the Sitecore environment's content generation, approval, and publication procedures go smoothly.
- Sitecore was integrated with third-party services and APIs, such as CRM and analytics platforms, to facilitate smooth data interchange and improve functionality.
- **Tech Stack:** C#, ASP.NET MVC, Web API, Sitecore 8.3 , HTML5, CSS3, TypeScript, JavaScript, jQuery.

Programmer Analyst : Cognizant (Nov 2020 - May 2022)

- Created scalable modules using ASP.NET MVC, focusing on building interactive widgets that enhance user experience and data visualization.
- Developed complex data grids and hierarchical structures that support efficient data management, enabling users to navigate and interact with large datasets seamlessly.
- Collaborated with UI/UX designers to translate wireframes into functional, responsive interfaces, improving user engagement and satisfaction.
- Integrated third-party APIs and services to enrich application functionality and streamline data flow across systems.
- **Tech Stack** : C#, ASP. NET MVC, Web API, SQL Server, Entity Framework, RESTful Services , HTML5, Typescript, Javascript, JQuery.

ADDITIONAL INFORMATION

EDUCATION: Sinhgad college of Engineering ,pune.

B.E (Electronics & Telecommunication) 2016-2020

8.66 CGPA.

Skills: C# ,ASP.NET MVC , WEB API, SQL SERVER , SITECORE ,ENTITY FRAMEWORK , ADO.NET ,JAVASCRIPT,TYPESCRIPT, JQUERY,.NET CORE, Winforms, Unit Testing, Design Pattern , Solid Principles.
