EXPERIENCE

RPA DEVELOPER & SUPPORT ANALYST, 11/2019 - Current

Sonata Software Pvt Ltd, Bangalore, India

Job Description:

- Designed, developed, and supported RPA solutions using UiPath to automate critical business processes.
- Worked on end-to-end development of 2 projects using UiPath, addressing business inefficiencies and improving productivity.
- Actively diagnosed and resolved production issues within UiPath, ensuring minimal downtime for critical processes.
- Provided support for existing processes, including root cause analysis of issues arising in day-to-day operations and implementing appropriate solutions.
- Oversaw the monitoring and management of bots, ensuring consistent performance and reliability.
- Supported Blue Prism RPA platforms by addressing production issues and providing maintenance assistance as needed.
- Contributed to Document Review and Code Review processes to maintain quality standards.
- Supported development teams during User Acceptance Testing (UAT), deployments, and rollout phases to ensure smooth transitions.
- Demonstrated strong problem-solving skills in resolving daily operational challenges within RPA processes.
- Provided prompt resolutions to customer-reported issues and escalated critical concerns when necessary.

- Actively participated in Weekend BOT Maintenance Support, ensuring system stability during critical periods.
- Listened attentively to customer feedback, addressing concerns and identifying areas for process improvement.
- Engaged in team-building activities to foster collaboration and positive working relationships.
- Maintained a flexible work schedule to accommodate night, weekend, providing 24/7 support when required.
- Familiarity with tools such as ServiceNow for incident tracking and Splunk for monitoring and analyzing automation performance.
