

SANKEERTHI TADEPALLI

Snowflake Developer

Email: sankeerthitadepalli9@gmail.com

Phone: +91-9390815987

PROFESSIONAL SUMMARY:

- Around 2 years of experience as a Python Developer and Snowflake cloud data warehouse developer.
- Hands-on experience in developing data pipelines using Python and Snowflake.
- Proficient in handling structured and unstructured data formats like JSON and CSV.
- Experience with cloud platforms such as AWS, particularly with services like S3 for data storage and processing.
- Solid understanding of SQL for querying and managing data in relational databases, including Snowflake.
- Familiar with ETL processes and data transformation techniques in Snowflake and other platforms.
- Knowledge of data engineering concepts such as data modeling, pipeline automation, and Snowflake-specific optimizations.
- Familiar with version control tools like Git and basic workflow scheduling tools.
- Knowledgeable in the Software Development Life Cycle (SDLC) with a focus on Agile practices.

EXPERIENCE:

Software Developer

Nexzera

Sep 2023 – Present

Software Engineer Trainee

Terralogic Software Solutions

Feb 2023 – June 2023

EDUCATION:

Bachelor of Technology in Electronics and Communication Engineering
Sree Venkateswara College of Engineering, Nellore
2019 – 2023

TECHNICAL SKILLS:

- Cloud Data Warehouse: Snowflake Cloud Data Warehouse (4.14), AWS S3
- ETL Tools: DBT, Informatica
- Databases: Oracle 11g/10g/9i/8i
- Tools: Python Developer
- Programming Languages: SQL, Python, JavaScript, Oracle SQL, C, HTML , CSS
- Operating Systems: Windows, Linux
- Scripting Languages: Python

PROJECTS:

Project 1: AstraZeneca

Role: Snowflake Cloud Data Warehouse Developer
Environment: Informatica, Oracle 11g, AWS S3, Linux

Roles and Responsibilities:

- Developed SnowSQL queries for incremental loads using merge statements
- Extensive experience with Snowflake concepts such as SnowSQL, Snowpipe, Tasks, Streams, Time Travel, Optimizer, and Data Sharing.
- Proficient in data warehousing (star and snowflake schema), dimensions, facts, and data modeling.
- Gathered and analyzed project requirements.
- Developed views, materialized and secure views for reporting.
- Good exposure to loading and unloading from various sources, bulk loading, and Snowpipe configurations.
- Deep understanding of performance tuning and techniques.
- Good exposure on creating various tables and stages.

Project 2: Travel Planner

Role: Python Developer
Environment: Flask, PostgreSQL

Roles and Responsibilities:

- Developed backend functionality using Flask for routing, user authentication, and business logic.
- Implemented user authentication using Flask-Login for secure login/signup processes.
- Designed and developed the itinerary planner feature, allowing users to create, update, and manage travel plans.
- Integrated Google Maps API to display destinations and routes on an interactive map.
- Utilized PostgreSQL to store user data, trip details, and cost estimates.
- Worked on cost estimation logic to calculate and track expenses based on user-selected activities and duration of the trip.
- Ensured mobile-friendly design with responsive layouts using HTML5, CSS3, and Bootstrap.
- Used Git/GitHub for version control and project management.

DECLARATION:

I declare that the above details are true and correct to the best of my knowledge.
