SUMMARY

As an Executive Application Support professional, I specialize in system monitoring and problem-solving, utilizing analytical and teamwork skills to minimize downtime and enhance incident management. I have significant experience in network and software support, technical solution implementation, and system performance optimization. My expertise in operating systems, networking protocols, technical support and along with knowledge of Python and SQL, demonstrates my commitment to continuous learning and growth.

EDUCATION

Priyadarshini College Of Engineering, Nagpur, India

Bachelor's Degree in Engineering - 2020
Graduated with 7.91 CGPA

KDK Nagpur Polytechnic, Nagpur, India

Diploma in Computer Technology - 2017
Graduated with 68.76%

SKILLS

- **Programming Languages:** Python (Beginner to Intermediate), SQL (Beginner), R (Basics)
- **Data Management:** Database Management, Power BI, Spark (Basics), CRUD Operations
- **Software Development:** Python Development, API Integration, File Handling, Data Parsing
- **System Support:** Application Support, System Monitoring, Networking Protocols, Incident Management
- **Tools & Technologies:** Power BI, SQLite, JSON, CSV, Spreadsheets, Git, GitHub, Visual Studio
- **Problem-Solving:** System Optimization, Technical Troubleshooting, Root Cause Analysis

PROJECTS

- **Personal Expense Tracker :** Developed a simple GUI application for tracking daily expenses, with data stored in a SQLite database. Implemented features to calculate and display weekly and monthly spending summaries.
- **Weather App Using an API :** Built a weather app using the OpenWeatherMap API to fetch and display real-time weather information for user-specified locations.
- **Simple Quiz App :** Developed a quiz app that presents multiple-choice questions, calculates user scores, and stores questions in CSV or JSON files for easy updates.
