

Name: K SANTHI

Mobile: +91 9591603401

E-Mail: santhikatta19@gmail.com

PROFESSIONAL SUMMARY:

- Having 4years of professional IT experience in SQL and Snowflake Cloud Data warehouse.
- Having 2 years of working experience with snowflake cloud data ware house, AWS S3, GCP.
- Hands-on experience in bulk [loading](#) and [unloading](#) data into Snowflake tables using COPY command.
- Extensively working with SNOWPIPE for continuous data loading from AWS S3.
- Handling large& complex datasets like JSON and CSV files from various sources like AWS S3, GCP
- Expertise in working with Snowflake Multi-cluster Warehouses.
- Working with Internal/External Stages, Store Procedures, Clone, Tasks and Streams.
- Hands on experience with zero copy cloning.
- Storage Considerations for Staging and Permanent Databases / Tables.
- Experience with Snowflake cloud data warehouse and AWS S3 bucket for integrating data from multiple source system which include loading data into snowflake tables.
- Experience in building Snow pipe.
- Hands on experience in extraction, transformation and loading of data.

PROFESSIONAL EXPERIENCE:

- Worked as ANALYST at Onlane solutions pvt ltd from June 2020 to october 2022.
- Worked as ASSOCIATE CONSULTANT at **Capgemini technology services India ltd** from Oct 2022 to Apr 2024.

EDUCATIONAL QUALIFICATION:

- **B. TECH** from JNTU Anantapur (2020) with an aggregate of 71%

TECHNICAL SKILLS:

- **Cloud Data warehouse** : Snowflake
- **Databases** : Oracle ,SQL
- **Database Tools** : Matillion, Git, Bit bucket, SQL *plus
- **Cloud services** : AWS S3, IAM
- **languages** : snowflake, SQL, python
- **Operating System** : Windows 10

PROJECT SUMMARY 1:

PROJECT : WIND RIVER CLOUD MIGRATION
CLIENT : Wind River
Role : Snowflake Developer

DESCRIPTION:

Wind River Systems, also known as Wind River, is an Alameda, California-based wholly owned subsidiary of TPG Capital. The company develops embedded system software consisting of run-time software, industry-specific software solutions, simulation technology, development tools and middleware, which is software and operating systems for information appliances and devices for intelligent connected systems.

Roles and Responsibilities:

- Created internal and external stages and transformed data during load.
- Designed Staging, Integration, Information and Archive areas on S3
- Used Temporary and Transient tables on different datasets
- Shared sample data using grant access to customer for UAT.
- Created S3 events for job triggering.
- Zero Copy cloning – Cloning databases for Dev and QA environments
- Time Travel, Data Retention Settings for Storage for Crucial Tables.
- Data Sharing from Prod to Stage and Dev Environments.
- Worked on Snowflake streams to process incremental records.
- Designed Update and Insert strategy for merging changes into existing Dimensions and Fact tables
- Unloaded the data from snowflake to send data to down streams.

PROJECT SUMMARY 2:

CLIENT : Citizen's bank
Environment : Informatics power center 9.5,Oracle,Unix
Role : Informatica Developer

DESCRIPTION:

Novartis International AG is a Swiss multinational pharmaceutical corporation based in Basel, Switzerland. It is one of the largest pharmaceutical companies in the world. In 2014, In March 1996, the companies Ciba-Geigy and Sandoz merged to form Novartis; the pharmaceutical and agrochemical divisions of both companies formed Novartis as an independent entity. Other Ciba-Geigy and Sandoz businesses were sold or like Ciba Specialty Chemicals, spun off as independent companies.

RESPONSIBILITIES:

- Responsible for task distribution among the team.
- Responsible for all activities related to the development, implementation, administration and support of ETL processes for large scale snowflake cloud data warehouse.
- Bulk loading from external stage (AWS S3) to internal stage (Snowflake) using Copy Command.
- Loading data into snowflake tables from internal stage and on local machine.
- Used Copy, LIST, PUT and GET commands for validating internal and external stage files.
- Used import & export from internal stage (Snowflake) VS external stage (S3 Bucket).
- Perform troubleshooting analysis and resolution of critical issues.
- Involved in data analysis and handling ad-hoc requests by interacting with business analysts' clients and resolve the issues as part of production support.
- Working complex Snowflake SQL scripts in Snowflake cloud data warehouse to Business analysis to reporting.
- Develop, Test, Deploy Various Informatica ETL Mappings for data sources like Flat files, salesforce, Postgres, snowflake cloud DB.
