Bengaluru, India

SUMMARY

I am a dedicated and ambitious MSc Data Science and Analytics graduate with a strong passion for entering the field of Data Science. I focus on honing my skills in Data Visualization, Data Analytics, Machine Learning, Python, SQL, and Power BI. I am reliable and dedicated with a hardworking and resourceful approach, eager to contribute to innovative data solutions.

INTERNSHIP

Intern

Chools Consulting Services & Training

01/2024 - 04/2024 Bengaluru, India

Consulting service focused on providing training in data analytics.

- Developed skills in data visualization, data modeling, and report creation, contributing to improved data-driven decision-making processes.
- Acquired practical experience in SQL database management during the apprenticeship, including designing, querying, and optimizing databases.
- Applied SQL skills to extract, manipulate, and analyze data, ensuring accuracy and efficiency in handling large datasets.
- Utilized programming languages such as Python and R to implement machine learning algorithms and statistical analyses, enhancing problem-solving abilities in the realm of data science.

Intern

Alpha IOT Privited Limited with Services and Training

05/2024 - 10/2024 Bengaluru, India

Company specializing in IoT solutions.

- Developed skills in Python, SQL, Linux, Power BI, Machine Learning, and MS Excel.
- Built different datasets and analyzed them in Python including Weather dataset, Netflix dataset, Population, and Cars dataset.
- Acquired practical experience in Linux during the apprenticeship, including designing, removing, adding, copying, and displaying the query.

PROJECTS

Marketing Analysis

08/2023 - 11/2023 Bengaluru, India

Marketing Analysis project focusing on data visualization and analytics using Power BI.

- Built a Dataset then imported it into a Power BI app to calculate a chart based on visualization.
- Visualized the dataset including customers, reviews, product ratings, and geographic data.
- Created charts and graphs to provide visuals of the data using Data Visualization in Power BI.

Cricketer Batting Analysis

01/2024 - 04/2024 Bengaluru, India

Cricketer Batting Analysis project utilizing machine learning and data visualization techniques.

- Loaded the Dataset, cleaned data, and created a model for ten players.
- Calculated relevance between user queries and score descriptions.
- Visualized player performance metrics such as scores, strike rate, and runs.
- Developed a Python app that allows users to input a player query and retrieves top relevant results based on player's score.

KEY ACHIEVEMENTS

Data Processing Enhancement

Increased data processing speed by 30% using optimized SQL queries and algorithms.

Efficiency In Reporting

Reduced report generation time by 40% with efficient data visualization techniques.

Marketing Insights Optimization

Improved marketing insights accuracy by 20%, impacting strategic decisions.

Automation In Data Modeling

Automated data modeling processes, saving 15 hours monthly on manual tasks.

SKILLS

Algorithms

Big Data

big data analytics

Data Modeling

Data Science

Data Visualization

database management

DAX

EXCEL

IoT

Linear Algebra

Linux

Machine Learning

Microsoft Excel

Power BI

powerbi

Python

SQL

sql database

STRENGTHS

Organization & Time Management

Strong organizational and time-management skills.

Teamwork

Ability to work independently and as part of a team.

Communication

Effective communication skills.

Critical Thinking

Demonstrates critical thinking in problem-solving.

EDUCATION

MSc.

Jain University

01/2022 - 01/2024 Bengaluru, India

BSc.

Periyar University

01/2019 - 01/2022 Tamil Nadu, India
