Sri Krishna Arts and Science College
B.Sc. Computer Science & Application
From June 2017 to September 2020

PROFILE SUMMARY

I am a data analyst with 3 years of experience specializing in data collection, validation, and synthesis to generate actionable insights. As POC, I successfully managed end-to-end project deliveries and team activities, fostering strong client relationships and ensuring high satisfaction, particularly with global teams like eBay. Proficient in SQL, Excel, and other advanced tools, I excel at organizing, analyzing, and transforming data into valuable insights while maintaining high-quality standards.

EXPERIENCE

○ Data Analyst

Vserve Ebusiness Solutions India Private Limited

From January 2024 to March 2024

- Designed buyer site web pages for global e-commerce companies that increased their user engagement and product enrichment for business growth
- Analyzed and developed a series of product descriptions and meta keywords for e-commerce websites, which increased website conversion rates.

○ Associate Analyst

MERKLE Inc.

From February 2021 to December 2023

- Collaborated closely with US, UK, and IL onsite clients, engaging as a dedicated point of contact and efficiently resolving any project-related concerns or barriers, creating efficient and transparent communication channels, and regularly fulfilling data submission deadlines.
- Achieved the "Be Accountable" award for delivering tasks promptly with 99% accuracy, successfully handling the eBay taxonomy design team's crucial task autonomously with high attention to detail, and decreasing compliance mistakes inside a highly regulated environment.
- I worked on multiple vertical databases for eBay's catalog team and converted data into insights while also creating, updating, and deleting the various category attributes and values.
- Efficiently managed Jira tickets, assigned tasks to teammates, provided guidance and feedback, conducted daily QA on completed tasks, and updated Jira with progress to ensure seamless project execution and maintain high-quality standards.
