

Experienced (7 years) Automation Developer with a demonstrated history of working in the IT and services industry. Skilled in (RPA) Robotic Process Automation development using UiPath.

PROFESSIONAL EXPERIENCE:

- Over 5+ years of Experience in delivering efficient and scalable end-to-end RPA processes automation using UiPath. Designed and develop complex unattended and attended automations.
- **Expertise in the full RPA lifecycle:** requirement gathering, analysis, coding, documentation, development, testing (UNIT/SIT/UAT), deployment, hyper care & production support.
- **Maintained robust documentation:** Developed and maintained key RPA documentation, including PDDs, SDDs, test plans, and user guides, ensuring clarity and consistency throughout project lifecycles.
- **Orchestrator Management:** Proficient in managing Robots, processes, queues, assets, and schedules using UiPath Orchestrator, ensuring smooth operation and process efficiency.
- **Built robust RPA solutions:** utilized the RE Framework for optimal performance and maintainability, with experience in automating Web, Desktop, Mainframe Applications, PDFs, and Excel.
- **Process Optimization & Maintenance:** Managed RPA processes by providing bug fixes, implementing change requests, and optimizing workflows for enhanced performance.
- **Adept in various UiPath features:** Document Understanding, Action Centre, Computer Vision, Remote Runtime, and Web Driver Protocol.
- **Excel & VBA Automation:** Developed Mini bots with Excel VBA Macro. Integrated VBA macro with UiPath.
- **Power Automate & Power BI:** Hands-on experience in automation & data analysis tools.
- **Web Development:** Background in developing web applications using AngularJS, C#, HTML, and ASP.Net MVC.
- **Database Management:** Skilled in RDBMS (SQL) for managing databases and stored procedures.
- **SDLC Methodologies:** Strong understanding of Agile and DevOps practices.
- **Generative AI:** Knowledgeable in Generative AI and LLMs with practical experience in Google Bard, PALM API, and Vertex Studio; completed Google Cloud Generative AI Fundamentals course.
- **Client Communication:** Effectively collaborate with clients to understand their needs, proactively address concerns, and ensure successful project outcomes.

SKILL SET:

- **RPA Tools:** UiPath (Studio, Orchestrator, Robot), Power Automate.
- **Programming Languages:** C#, Python, VBA Macro, LINQ
- **Databases:** Microsoft SQL Server
- **Project Management and Reporting Tools:** Git, Azure DevOps, TFS/VSTS
- **Frameworks:** RE Framework, ASP.NET MVC, DOT NET Framework, AngularJS
- **Tools:** Power BI, SQL Visual Studio, MS Office.

CERTIFICATIONS & BADGES:

- **UiADPv1:** UiPath Certified Professional Automation Developer Professional
- **PL-900:** Microsoft Certified: Power Platform Fundamentals

EXPERIENCE DETAILS:

- **Associate – Projects**
Cognizant Technology Solutions | May 2022 – Present
- **Application Development Analyst**
Accenture India private limited, Bangalore | Dec 2019 – Apr 2022.
- **Application Development Associate**
Accenture India private limited, Bangalore | Feb 2018 – Nov 2019.

PROJECT DETAILS:

Cognizant

Associate (Sr. RPA Developer), May 2022 to Present

Intelligent Process Automation : Automation of Web application, ERP application, PDF, Excel and OCR based automation using Uipath. Creating mini bots using VBA macros

Key Deliverables:

- Implemented both Attended & unattended, end to end RPA automation solution with Uipath tool.
- Implemented mini bot with VBA Macro to automate Excels.
- Implemented the Power BI dashboard as a part of analytics.
- Collaborate with leaderships and SMEs for automation opportunities identification, feasibility assessment and Requirements gathering.
- Design the PDD and SDD for the Process and develop the automation process as per the documents.
- Design the Unit Test cases, do the SIT and UAT for the Process.
- Providing the production support to the processes and achieve their stability.
- Act as a deployment manager to deploy processes to the Orchestrator
- Manage the Uipath Attended and Unattended Licenses and updates.
- Support the old process and troubleshoot the issues associated with them.

Accenture

Application Development Analyst, DEC 2020 to APR 2022

Accenture Operations RPA Team : Development and Production support to Uipath Robots and Processes

Key Deliverables:

- Provide production support to over 25 bots for 4 different clients.
- Manage the jobs using Uipath Orchestrator Jobs, Queues, Assets, Triggers, Folders and other features.
- Managing the Orchestrator Access, Licenses and credentials. Also Handling the deployments.
- Monitor the jobs and fix them in case of earlier in case of failure.
- Implement the changes and updates in the process and conduct UAT, handover and hyper care.
- Implemented robust Uipath processes using REFramework.
- Manage the Bot and Orchestrator servers and the Database servers. Handling the Server and OS Upgrades patches and conduct the testing post upgrades.

Application Development Associate, FEB 2018 to DEC 2020

Accrual tool: Accrual Application is self-service portal (on-premises) for Accenture business people to access services like creating and approving the Accruals

Key Deliverables:

- Production support of the Accrual Process Tool.
- Developing of new functionalities and Enhancements, documentation, and unit testing.
- Handling the bug fixes and implementing the change requests for the application.
- Solving complex/minor code issues, fixing database discrepancies.
- Implementing the updates and migrations in the technology, like AngularJs Upgrade, AzureAD migration.
- Implementing mail functionality in existing stored procedures to get team members/business notified of success and failure of the process
- Worked as deployment manager and handled the new releases and deployments.
- Resolution of incidents in the form of tickets categorized into various severities / priorities.
- Effectively Communicated with clients to understand business requirements. Discussed issues of concerns seeking resolution when needed.
