SUMMARY

I am an AWS-certified Data Analyst with 1 year of experience, specializing in transforming data into actionable insights. I have worked with over 100,000 rows of data using Python and SQL to optimize business processes, identify trends, and inform decision-making. Proficient in building dynamic Power BI dashboards and crafting concise reports, I focus on data cleansing, visualization, and predictive modeling to drive measurable improvements and enhance business performance.

EXPERIENCE

Analyst

Chakr Innovation

Jan'24 - Present, Gurugram, Haryana, India

- Developed and automated Python scripts using libraries such as pandas, DateTime, Pytz, Motor, and threading to efficiently scrape data from DG IoT devices, collecting key metrics like KVA readings, ampere readings, and fuel levels.
- Transformed, collected & reviewed data, creating reports and refined large sets of raw data into structured Excel sheets, ensuring improved accuracy and clarity for thorough analysis and better decision-making.
- Collaborated with finance & operations teams to drive actionable insights through data visualization, delivered 12 detailed strategy reports that enhanced decision-making processes & contributed to a 15% increase in operational efficiency.
- Created detailed data visualizations in Power BI, converting complex datasets into clear, actionable insights, allowing stakeholders to monitor DG performance, trends, overall efficiency & reducing Costs.
- Through detailed analysis, concluded that DGs perform optimally when the fuel tank is maintained at 80% capacity, a key insight that has led to more effective maintenance and performance optimization strategies.

Data/Business Analyst

GroRapid Lab

Sep'24 - Dec'24, Gurugram, Haryana, India

- Spearheaded data-process automation at GroRapid Labs using advanced Excel and Python scripting, boosting accuracy and cutting processing time by 30%.
- Led the scraping, storage, and maintenance of 50,000+ valuable data records, ensuring refined and high-quality.
- Collaborated cross-functionally to drive data-driven decision-making, leveraging Power BI and AWS to deliver strategic reports that improved business efficiency and outcomes.

CERTIFICATION

AWS DATA ANALYTICS

AWS • 2023

AWS ACADEMY CLOUD FOUNDATION

AWS • 2023

SKILLS

Tools & Technical Skills: SQL, Python (Programming Language), JavaScript, Amazon Web Services (AWS), Microsoft Azure, PowerBI, Tableau, Git, TensorFlow, Pandas, Numpy, PostgreSQL, MySQL, PLSQL, Strategically Thinking, SAP, Oracle, MS Office **Interpersonal Skills:** Public Speaking, Leadership, Teamwork, Communication, Problem Solving, Consulting

PROJECTS

Data Visualization Dash App

Dec'23

Developed & Deployed a Data Visualization App which displays the country's GDP in relation to their population Deployed on [Render](#).

Voice Assistant Using Python

May'23

Developed a voice assistant using Python to send email and open basic commands like, Google and YouTube using Speech recognition API.

EDUCATION

Bachelor of Technology, Computer Science

Galgotias University • Greater Noida • 2023 • 8.4 / 10
