

SARIKA B K

Azure Data Engineer

sarikabk8991@gmail.com | +919482433863 | Bangalore, Karnataka

OBJECTIVE

To work in a dynamic team that offers the opportunity to enhance and utilize my skills and knowledge to the best towards achieving organizational objectives.

PROFESSIONAL SUMMARY

Azure Data Engineer with 3.9 years of experience in transforming and organizing data to support business decisions on Azure cloud. My primary role involves ETL (Extract, Transform, Load) processes, utilizing technologies like Spark, PySpark, Python, SQL, and Scala for efficient data processing and integration. Experienced with Azure Data Lake Storage (ADLS), Azure Blob Storage, Azure Databricks, Delta Lake, and Azure DevOps to deliver scalable, high-performance, cloud-ready data solutions. Continuously enhancing skills in Data Engineering to stay current with evolving technologies and best practices.

TECHNICAL SKILLS

- **Programming Languages:** Python, PySpark, SQL, Scala.
- **Azure Services:** Azure Databricks, ADLS, Azure Blob Storage, Delta Lake, Azure SQL.
- **Version Control / DevOps Tools:** Azure DevOps (code deployment), Bitbucket (code deployment).
- **Other Tools:** JIRA/Confluence, IntelliJ IDEA, SQL Server, WinSCP, PuTTY, MS Office Suite.

PROFESSIONAL EXPERIENCE

Employer	Period	Designation
Tata Consultancy Services	Dec 2021 – Nov 2025	System Engineer

EDUCATION

Degree	Institution	Year of Passing	CGPA
Master of Computer Science	St. Philomena College – Puttur, Karnataka	2021	8.07

PROJECT DETAILS

Project 1 : Banking Controls Testing & Assurance	
Duration	July 2024 To Nov 2025
Technology	PySpark, Python, SQL, PuTTY, Control-M, Bitbucket
Project Abstract	The project involves supporting control reviews to ensure coverage of regulatory requirements.
Role and Responsibilities	Developer – Data Analytics • Built and optimized PySpark scripts to mask sensitive data (Text, Email, Number, Date) in Avro files using regular expressions, ensuring regulatory compliance. • Designed, automated, and scheduled ETL pipelines to load data from text files into reporting tables, supporting historical and incremental loads while improving runtime and reliability. • Optimized PySpark workflows for scalability and distributed processing, reducing ETL execution time. • Performed end-to-end data validation to ensure accuracy and integrity across source systems and reporting databases. • Deployed enterprise-wide data privacy solutions, strengthening adherence to compliance standards.

Project 2 : Pharmacy Data Integration Platform	
Duration	Jan 2022 To May 2024
Technology	Apache Spark, Scala, SQL, Azure Data Bricks, Azure DevOps
Project Abstract	The project focuses on optimizing pharmacy data, ensuring compliance and automating prescription refill processes.
Role and Responsibilities	Developer – Data Engineer • Developed scalable, real-time Azure Databricks pipelines for data ingestion, transformation, and curation in Microsoft Azure Cloud. • Performed data transformations using Spark SQL and DataFrames, converting raw data into structured, usable formats. • Managed Delta Tables (Lakehouse) with optimized read/write operations and partitioning for efficient storage and processing. • Tested and deployed code to higher environments using Azure CI/CD Services, ensuring smooth production rollouts. • Handled production defects, troubleshooting and resolving issues to maintain critical operations and meet SLA requirements. • Monitored and optimized pipeline performance to improve scalability, reliability, and efficiency in data processing.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ – 900)
- Microsoft Azure Data Fundamentals (DP – 900)
- Microsoft Azure Data Engineer Associate (DP – 203)
