

SARVESH PATANKAR

Aspiring cloud engineer with hands-on experience in Azure and Google Cloud, skilled in deploying secure and scalable infrastructures. I've developed expertise in optimizing networks, managing resources, and enhancing security compliance. Eager to contribute to dynamic teams while solving technical challenges and driving innovation. My passion for learning and adapting to evolving cloud technologies fuels my commitment to excellence.

WORK EXPERIENCE

ANZ Bank December 2024

Security Analyst Intern (Virtual Internship)

- Generated detailed security reports by examining and analyzing network packets, phishing attacks, and other potential security threats.
- Investigated and gathered information on malicious emails and links, creating in-depth reports to identify and mitigate threats.
- Analyzed data from PCAP files, outlining processes and steps to detect malicious activities in network traffic.
- Stayed updated on evolving security threats and developed mitigation strategies to enhance organizational security measures.

Tata Consultancy Services November 2024

Cybersecurity Analyst Intern (Job Simulation)

- Completed a job simulation focusing on Identity and Access Management (IAM) in collaboration with a Cybersecurity Consulting team.
- Gained expertise in IAM principles, cybersecurity best practices, and aligning security strategies with business objectives.
- Delivered comprehensive documentation and presentations, effectively communicating complex technical concepts.
- Developed skills in IAM Design, Evaluation, Fundamentals, and Strategic Assessment to solve real-world cybersecurity challenges.

PROJECTS AND SIMULATIONS

Networking Project on Azure

- Configured **Site-to-Site VPN** using **IKEv2 tunnel** for secure connectivity between on-premises and Azure.
- Established **Point-to-Site VPN** connectivity with Active Directory authentication for individual user access.
- Designed and implemented **DNS** and **Virtual Network (VNet) peering** to ensure seamless network communication across environments.
- Configured **Active Directory Domain Services (AD DS)** and implemented **Azure AD hybrid join**, enabling seamless integration of on-premises and Azure environments.
- Worked extensively with hybrid environments to ensure a unified and efficient infrastructure.
- Prepared comprehensive documentation for the configuration process, troubleshooting, and ongoing management.

Subscription and Resource Migration

- Migrated resources and resource groups during **subscription-to-subscription migration** within Azure to optimize organization and **cost management**.
- Ensured minimal downtime during migration and created detailed documentation for repeatable processes and **best practices**.

TOOLS & TECHNOLOGY

PROFICIENT:

- MICROSOFT OFFICE SUITE
- MICROSOFT 365 (M365)
- WINDOWS
- ACTIVE DIRECTORY

ADVANCED:

- DOCKER
- SQL & DATABASES
- NETWORKING
- POWER SHELL

INTERMEDIATE:

- KUBERNETES
- LINUX

BEGINNER:

- DISASTER RECOVERY
- SECURITY TOOLS
- WINDOWS DEFENDER
- MICROSOFT DEFENDER FOR CLOUD

SKILLS

- Cloud Platforms: IaaS, PaaS, SaaS
- Core Azure Services: Azure Virtual Machines (VMs), Storage, Virtual Networks (VNETs), Load Balancers (30+ hours).
- Networking: Site-to-Site VPNs, Point-to-Site VPNs, VNet Peering, DNS, Azure Gateways (20+ hours).
- Identity & Access Management (IAM): Azure AD, MFA, Conditional Access, RBAC
- Security & Compliance: Azure Security Center, ISO 27001, GDPR, Azure Policy
- Monitoring & Performance: Azure Monitor, Log Analytics, Performance tuning
- Disaster Recovery: Backup Vaults, Recovery Services, DR Strategies
- High Availability: Application Gateways, VMSS, Scalable Infrastructure
- App Development: Azure Static Web Apps, GitHub CI/CD
- Resource Management: ARM Templates, Subscription Migrations
- Digital Investigations: OSINT, Network Traffic Analysis
- Solution Design: Project Planning, Critical Thinking, Cloud Architecture
- Business Processes: Cloud Alignment, Strategy Analysis
- Containerization & Orchestration: Docker, Azure Container Registry (ACR), Kubernetes (AKS), Helm, CI/CD for Containerized Environments

Azure Compliance and Security Project

- Implemented **Azure Security Center** to monitor and secure cloud resources, including configuring security policies, enabling threat protection, and vulnerability assessments.
- Configured **Azure Policy** to enforce compliance with organizational standards, ensuring that deployed resources met security and governance requirements.
- Integrated **Azure Key Vault** for managing and securing access to sensitive information like application secrets, **encryption keys**, and certificates.
- Conducted a compliance review and remediated issues to ensure adherence to standards such as **ISO 27001** and **GDPR**.
- **Documented** security configurations, incident response plans, and compliance audit findings for operational and reporting purposes.

Azure Static App Development

- Built and deployed an **Azure Static Web App** using GitHub for version control, hosting a responsive and scalable website.
- Documented deployment steps, version management, and **GitHub** integration for future scalability and maintenance.

Website Hosting on Virtual Machines

- Hosted a website using **Virtual Machine Scale Sets**, configured with an **Application Gateway** and **Load Balancer** to ensure high availability and scalability.
- Optimized infrastructure for performance and **documented architecture design**, implementation steps, and operational guidelines.

Cloud Security and Compliance Best Practices Implementation

- Configured **Multi-Factor Authentication (MFA)** and **Conditional Access Policies** using Azure Active Directory to enhance user authentication and secure resource access.
- Audited resource access permissions and implemented **Role-Based Access Control (RBAC)** for least-privilege access.
- Designed and implemented **Azure Backup** and **Recovery Services Vault** for disaster recovery, ensuring data resiliency.
- Set up **Log Analytics** and **Azure Monitor** for tracking performance and security metrics across all deployed resources.
- Prepared detailed reports on **security metrics**, compliance checks, and recovery tests to demonstrate adherence to organizational policies.

EDUCATION

Devi Ahilya Vishwavidyalaya, Indore, M.P		2021 - 2024
Bachelor's Degree		
St. Joseph School	Holy Family Public School	
10th (2019)	12th - PCM (2021)	

EXTRACURRICULAR ACTIVITIES

- Competed in the National Level Championship (**Stafford Challenge Cup**).
- Played in the **KSFA Super Division**, the fourth highest tier in the Indian football system.
- Led a 3-member unit for food collection drive for **Covid Relief**; visited **50+ families** across the society to obtain **300+ kg of food**.
- Facilitated operations for the **blood donation drive**; led a team of **4 to create handmade cards for donors**.

HOBBIES & INTERESTS

- Passionate about playing the **guitar and singing**, often exploring a variety of music genres.
- Enthusiastic **Semi-Pro football player** with a strong interest in team sports and strategy.
- Avid supporter of **Liverpool Football Club**, inspired by their teamwork and resilience.
