Sathish Krishna

Senior Test Lead

PROFILE SUMMARY

A seasoned professional with 15+ years of experience in software testing, spanning various platforms, technologies, and domains. I have a strong background in test automation, including 7 years with QTP, 6+ years with Selenium, and 1 year with Playwright using Typescript and GitHub Copilot. I am adept at leading automation initiatives, designing scalable frameworks, and mentoring QA teams to foster a culture of technical excellence and quality. My expertise includes implementing digital products with a focus on test automation and metric reporting, and I am skilled in using AI tools to analyze requirements to generate and update test cases to ensure comprehensive test coverage. My core strengths include:

- Leading and managing teams and Test Management Systems.
- Client relationship management and active communication with onsite teams.
- Developed and maintained Playwright-based end-to-end test suites, leveraging GitHub Copilot to accelerate script generation, improve code quality,

EDUCATION

2000

B.Tech/B.E.
University of Mysore ,
Mysore

WORK EXPERIENCE

Sep 2011 - Present

Senior Test Lead

FIS

- Led automation initiatives within the FIS Digital One products group, focusing on process improvements and researching automation capabilities.
- Designed and implemented a scalable, end-to-end test automation framework using Playwright and Typescript, which reduced manual testing effort and improved release velocity.
- Mentored a team of over 10+ QA engineers on advanced test automation principles and best practices.
- Managed the implementation of the Selenium Framework and optimized the testing process.
- Contributed to collaborative efforts in POCs (Proof of Concepts) for automation implementations for web applications.
- Recognized with the "Star of the Quarter" award for outstanding work.
- Worked on implementations for major banks including First Hawaiian Bank (FHB), First Bank Puerto Rico (FBPR), Sainsbury Bank, and First Merit Bank (FMER).

Jul 2010 - Sep 2011

Test Engineer

HCLTech

- Provided services for clients like Misys.
- Implemented the QTP Framework and managed the testing process.
- Mentored team members and optimized testing processes.

Apr 2006 - Jul
2010

Test Engineer

Computer Sciences Corp (CSC)

- Provided services for clients such as FIS, Bank of West and Bank of America.
- Contributed to automation testing using QTP and WinRunner.
- Participated in User Acceptance Testing (UAT) at Bank of the West, California, US from Feb 2009 to Apr 2009.

Projects

60 Months

Digital One

Served as the offshore lead for multiple banking implementations, including projects for First Hawaiian Bank (FHB) with IBS, First Bank Puerto Rico (FBPR), Sainsbury Bank, and First Merit Bank (FMER). Led the deployment of the Selenium automation framework, managed testing teams, oversaw test planning and execution, and provided mentorship to team members. Played a key role in optimizing testing processes and actively contributed to POC initiatives for automation.

COURSES & CERTIFICATIONS

- ISTQB Certified Software Testing Engineer (Valid upto 2030)
