SAMPLE PROJECTS

Hotel Booking Analysis

Project Overview: This project involves the findings of an exploratory data analysis (EDA) project conducted on a hotel booking dataset. This project aimed to investigate bookings trends, cancellation, revenue patterns, and customer segmentation, which can inform strategic decisions in the hospitality industry.

Tools and libraries used: python(jupyter), pandas, matplotlib, seaborn

Project link- <https://github.com/satyajeetbanerjee/Hotel-Booking-Analysis>

Telecom Customer Analysis

Project Overview: This project provides an analysis of customer churn in a telecom dataset. The goal of this analysis is to identify factors associated with customer churn and to gain insight that can help the telecom company reduce churn rates. Churn is defined as customers who have terminated their service and understanding the reasons for churn is critical for customer.

Tools and libraries used: python(jupyter), pandas, matplotlib, seaborn

11/2021 – 11/2022

Gurgaon, India

Software Engineer, KMG IT Services

- Developed the required features for the client project as a Dot net developer, integrating APIs and translating business requirements into elegant code solutions.
- Engaged with client to plan and optimize backend issues and queries.
- Collaborated with team to produce actionable development plans along with proper workflow.

SKILLS

C#

Encapsulation, Inheritance, Abstraction, Polymorphism, Design pattern.

Dot Net Web API

Routing in web api, Controllers and Actions, Model Binding, Content Negotiation, Error Handling, Authentication and Authorization.

MS- Excel

Formulas and Functions, Data Analysis tools (pivot table, pivot charts, Data visualization, Data cleaning and manipulation, Macro recording and VBA.

SQL

Data Retrieval, Filtering and Conditional Logic, Aggregations, Joins, Data Transformation, Date and Time Functions, Common Table Expressions (CTEs), Data Cleaning.

Python

Data Manipulation with Pandas, Data Visualization with Matplotlib and Seaborn, NumPy, Exploratory Data Analysis (EDA).

Power BI

Data Transformation with Power Query, Data Modeling, DAX (Data Analysis Expressions), Visualization and Reporting, Connecting to Data Sources.

PROJECTS

05/2022 – 10/2022

Convelo Rater (*KMG IT Services*)

Successfully developed and integrated the backend functionalities for the Convelo Rater project using C#, Dot Net Web API, SQL-Server, Entity Framework, Git, IIS 5.0. Collaborated with the client to understand their business requirements and implemented them in the backend code. Integrated the backend with frontend functionalities to create a seamless user experience.

01/2022 – 04/2022

MouseTap API (*KMG IT Services*)

Developed APIs for MouseTrap project, I supported in the development which to support and maintenance of test cases in to a central repository, The system uses microsoft .Net platform including Asp.Net, C#, IIS 5.0 and XML services as the middle tier for validation and security, ADO .Net to provide consistent, high performance access to all kinds of data.

EDUCATION

Kolkata, INDIA

Bachelor of Technology, *Maulana Abul Kalam Azad University of Technology, West Bengal*
Applied Electronics And Instrumentation Engineering (2016-2020).
