Objective

A Professional with 2.9+ years of experience in IT Industry. Highly skilled and motivated Data Engineer, seeking a challenging role in an innovative company to contribute to high-performing data solutions and further develop skills in data modeling, ETL, data warehousing, and cloud computing.

Profile Summary

- Expertise in various technologies, programming languages and AWS cloud platform.
- Collaborate with the team to understand the data pipeline and AWS infrastructure.
- Troubleshoot issues and checking error logs using AWS CloudWatch.
- Participate in code reviews and provide feedback to ensure high-quality deliverables.
- Monitor data pipelines for data processing and analysis.
- Modify Pyspark code to perform transformations in Glue.
- Writing SQL queries to perform analysis in snowflake.
- Good Knowledge in AWS cloud technologies like Glue, Lambda, IAM, S3, Ec2, Redshift, RDS, EMR, Athena, DMS which provides fast and efficient processing of Big Data.
- Good Communication skills with a positive approach, enabling effective collaboration with cross functional teams and stakeholders.

Technical Skills

Platforms: Windows, Linux

Programming Languages: Python, SQL

AWS Services: Glue, Lambda, S3, IAM, EC2, EMR, Redshift, RDS etc.

Big Data Ecosystem: Apache Spark/Pyspark, Hadoop, HDFS, Hive, Scala

Relational Database: Oracle, MySQL

Cloud Database: Snowflake

Visualization Tool: Power BI

Educational Qualification

- Bachelor of Computer Science MGM's Dr. G Y Pathrikar Collage of CS & IT, Aurangabad (2022)
Dr. Babasaheb Ambedkar Marathwada University, Aurangabad, Maharashtra.

Work Experience

Organization: Amara.ai, Gurugram

Experience: 3 Months

From: 19th Nov 2023 to 14th Feb 2024

Organization: Winjay Solutions Private Limited, Bengaluru

Experience: 2.6+ Years

From: 3th May 2021 to 3th Nov 2023

Project

Project: Retail and Domain Analytics.

Description : The goal of this project is to identify patterns and trends in the data that can inform business strategies and provide actionable recommendations.

Roles & Responsibility:

- Daily Scrum meetings for tasks status discussions and project work.
- Conducted data analytics for a retail client that resulted in increased user engagement and improved overall revenue. Utilized online E-Commerce platform data to identify areas of interest and patterns.
- Developed and modified Pyspark programs in AWS glue to perform transformations.
- Utilized Spark SQL as an alternative approach to speed up processing and improve performance.
- Wrote SQL queries to perform analysis in Snowflake environment.
- Worked closely with business analysts to ensure clear understanding of requirements.

Certificates:

SQL Intermediate (HackerRank) (07/2023 – Present)

Understanding of Complex joins, Union operations and sub-queries.

Python Basic (HackerRank) (08/2023) – Present

With a HackerRank-certified Python proficiency, I leverage my programming skills to optimize Data Workflows and deliver valuable insights for data-driven decision-making.

Declaration:

I hereby declare that the above given information is true and to the best of my knowledge.
