Professional Summary

A AWS Certified Solutions architect with experience in infrastructure cost optimization, troubleshooting, and incident resolution. Skilled in containerization, CI/CD tools, version control, and cloud solutions. Passionate about delivering scalable, secure, and automated solutions for complex projects.

Skills

AWS Services AWS Lambda, DynamoDB, S3, RDS	Infrastructure as Code CloudFormation, Terraform
Programming Shell Scripting, Python	Security AWS Security (IAM, VPCs, etc.)
Automation AWS CodePipeline, CodeBuild, CodeDeploy, CI/CD practices	Observability CloudWatch, Prometheus, Grafana
	Containerization Kubernetes, Docker
	Monitoring CloudWatch, CloudTrail, logging tools

Work Experience

IEMA R&D Pvt. Ltd, Kolkata, India (Cloud Engineer - I)

Jan 2023 - Present

- Optimized cloud infrastructure costs for efficient resource utilization.
- Delivered over 10 projects in 2+ years using AWS services such as EC2, S3, Elastic Beanstalk, and CodePipeline, effectively meeting client requirements and deadlines.
- Led the implementation of CI/CD pipelines using AWS CodePipeline.
- Provided advanced troubleshooting for incidents on Linux systems, significantly reducing downtime.
- Managed MySQL, MongoDB, and RESTful web services using an MQTT client to concurrently subscribe to 1,000+ IoT devices.
- Collaborated with development and operations teams to integrate cloud infrastructure into the software development lifecycle.
- Develop and implement cloud architecture strategies based on business requirements and best practices.

Crescendo Worldwide Pvt. Ltd, Pune, India (Data Management Trainee)

August 2021 - May 2022

- Developed and implemented streamlined data management procedures.
- Established rules and protocols for efficient data sharing.

Projects

Soft Skills & English Prep App (IELTS)

Role: Cloud Engineer

- Designed a scalable and automated architecture for the app using AWS Elastic Beanstalk, ensuring efficient resource use and adaptability for growth.
- **AWS Services Used:** Code Pipeline, Elastic Beanstalk, EC2.

AHM - Asset Health Monitoring System (Frontend & Backend)

Role: Team Lead

- Led a team of 3 interns in the development of AHM, an innovative Asset Health Monitoring System.
- Implemented a robust back-end in Elastic Beanstalk, utilizing the MQTT protocol for efficient device communication.
- Established data persistence using MySQL database.

News & Infotainment Webapp

Role: Infrastructure setup

- Collaborated with development teams to deploy cloud-based solutions, managing EC2 instances, load balancing, and scaling to support diverse client needs.
- **Technologies & AWS Services Used:** Code Pipeline, EC2, PHP, Shell Scripting, GitHub.

Education

Bachelor of Engineering (BE)

Zeal College of Engineering and Research, Pune

Courses / Certificates

- Certified AWS Solutions Architect - Associate (Issued by Amazon Web Services)
- AWS Certified Solutions Architect - Associate (Stephane Marek, Udemy)
- DevOps Beginners to Advanced (Udemy)
- AWS Certified Solutions Architect - Associate (Ethan's Tech Institute, Pune)
