

Sayam Jain

Backend Developer

✉ sayamjain0708@gmail.com ☎ +919402682526 📍 Bengaluru, Karnataka 🔗 PortFolio 🌐 LinkedIn 🐙 GitHub

PROFESSIONAL SUMMARY

Innovative Backend Developer specializing in distributed systems and microservices architecture. Proven track record of building robust, scalable backend solutions using Go-Lang, Node.js, Express, and AWS technologies. Strong expertise in designing high-performance APIs, implementing secure authentication systems, and optimizing database operations. Demonstrated ability to architect solutions that handle high-concurrency workloads while maintaining system reliability and performance.

EDUCATION

Oriental Institute of Science & Technology 🌐

Jul 2019 – Jul 2023 | Bhopal

Bachelor Of Technology in Information Technology (IT) - 7.9 CGPA

TECHNICAL EXPERTISE

Languages

- Go, JavaScript (ES6+), Python, HTML5, CSS3

Backend

- Node.js, Express.js, Microservices (Go)

Cloud & DevOps

- AWS (EKS, S3, Athena, Crawler), Docker

Version Control

- Git, GitHub

Frontend

- React.js, Next.js, Redux, EJS, TailwindCSS, Bootstrap, GSAP

Databases

- MongoDB, PostgreSQL

CI/CD

- GitHub Actions

Other skills

- RESTful APIs, WebSockets, Microservices Architecture, Event-Driven Architecture, Technical Writing (PRDs, BRDs),

PROFESSIONAL EXPERIENCE

EMotorad (<https://www.emotorad.com/>) 🌐

Oct 2023 – present | Bengaluru

Full Stack Developer

- Architected and implemented advanced geofencing system supporting multiple geometries (Circle, polygon, path-based) with real-time device tracking
- Designed and developed Change Data Capture (CDC) pipeline for real-time data processing, enabling efficient data synchronization
- Architected and deployed a real-time analytics platform leveraging AWS Athena and Apache Flink, providing actionable insights that drove a 50% increase in user engagement
- Integrated RocksDB for optimized state storage in geofencing applications
- Developed fall detection system with real-time monitoring and alert mechanisms
- Created scalable coin management system with history tracking and moderator controls
- Engineered diagnostic notification system for vehicle health monitoring (brake, battery, chain, motor) based on odometer readings
- Managed and optimized staging and production server environments, ensuring seamless deployments and maintaining high reliability.
- Developed and implemented a Python-based GUI tool for streamlining firmware flashing processes on microcontrollers, resulting in a 70% reduction in time-to-market
- Implemented and integrated Google Workspace tools across departments, streamlining collaboration workflows and significantly enhancing productivity

KEY PROJECTS

Techshop Ecommerce

 🌐

Javascript | CSS | MERN | Next.js | React.js

- Architected and developed a full-stack e-commerce web application using Next.js, React.js, and Tailwind CSS.
- Optimized performance and achieved a 90+ Google Lighthouse score and improving page load times by 30%

FixPoint - EV Services Platform

 🌐

Html, Css, Javascript | Express.js | MongoDB | Node.js | EJS | Bootstrap

- Built a full-stack website catering to electric vehicle owners in India, offering a range of services and secure user experience
- Implemented responsive design and optimized database queries, resulting in a 50% improvement in page load times

WhatsApp B2B2C Communication Tool

Node.js, Express.js, Whatsapp-web.js

- Developed a WhatsApp business tool to enhance brand communication, deliver financial information, and offer efficient payment gateways
- Integrated with multiple payment providers, resulting in a 30% increase in on-time payments for client companies

AWARDS AND ACHIEVEMENTS

Hackathon - Codebite

 🌐

- Hackathon Champion:** Recognized as one of the top 8 teams out of 500 for overall project and presentation excellence
