Profile

I am a versatile and results-driven **Android Application Developer** with 2.7 years of experience in building high-performance, scalable mobile applications using **Java**, **Kotlin**, and modern Android development practices. Proficient in **MVVM architecture**, third-party **SDK integration**, and API handling, I excel in delivering applications that meet business needs effectively. I combine strong technical skills with creative problem-solving to ensure efficient and optimised mobile solutions.

Technical Skills

- **Programming Languages:** Java, Kotlin, C, XML
 - **Android SDK:** Jetpack Compose, Material Design, ViewModels, LiveData, WorkManager, Navigation Component, Data Binding, View Binding, Coroutine
 - **Libraries:** Retrofit, Glide, Room, Firebase, Dagger/Hilt (Dependency Injection)
 - **Tools:** Android Studio, Git, GitHub, GitLab, Gradle
-

Professional Experience

Software Engineer

Mantra Labs | June 2022 – Present

Care Health Insurance App (1M+ Downloads) [\[Link\]](#)

- Collaborated with clients to deliver tailored solutions, implementing MVVM architecture and third-party SDKs to enhance scalability, performance, and user experience.
- Integrated new modules using Java and Kotlin, optimising data management and implementing a user behaviour tracking system to meet business objectives.
- Identified and resolved production issues, maintaining application stability and conducting quality assurance tests to ensure high usability and code quality.

DCM Shriram e-Suvidha App (50K+ Downloads) [\[Link\]](#)

- Developed key features with Coroutines, Room, and Retrofit for efficient data handling.
 - Upgraded the project to reduce PlayStore crashes, improving overall app stability and user experience.
 - Optimised memory usage and enhanced app performance by fine-tuning background processes and managing lifecycle events effectively.
-

Projects

Plantonic eCommerce App (Personal Project) [\[Link\]](#)

- Developed a full-featured eCommerce application using Kotlin and XML, with Firebase Authentication for secure user management and seamless login/logout functionality.
 - Implemented key features such as a dynamic product category with search, sort, and cart functionalities, providing users with a smooth and intuitive shopping experience.
-

Education

Bachelor of Technology in Electronics and Communication Engineering

GURU NANAK INSTITUTE OF TECHNOLOGY | 2018-2022| 8.57
