Address Hyderabad, Telangana, 500072

Summary

Senior Android Developer with 10+ years of experience building scalable mobile apps, specializing in Kotlin, Java, and modern architectures. Expertise in optimizing performance, data handling, and leading cross-functional teams to deliver robust mobile solutions. Proven ability in designing end-to-end mobile strategies and architecture for long-term scalability.

Key Skills

Languages: Kotlin, Java, Javascript, Python, XML, C++

Mobile Development: Android SDK, Jetpack, Android Studio, Jetpack Compose, Coroutines & Flow, Design Patterns, Android Architecture, Glide, Picasso, Dependency Injection, Material Design, Fragmentation Handling

Architectures: MVVM, MVC, MVP, Clean Architecture

Data Structures & Algorithms: Arrays, Linked Lists, Stacks, Queues, HashMaps, Trees, Graphs, Dynamic Programming, Sorting, Searching

Database: SQLite, Room, Realm, Firebase

Networking: REST APIs, Retrofit, GraphQL

Version Control: Git, GitHub, GitLab, SVN, Bitbucket

Testing: JUnit, Espresso, Mockito

Education

2010 - 2013

Master of Computer Applications

Nalanda Institute of Engineering and Technology - Guntur

Work History

08/2022 - Present

Lead Development Software Engineer

Housing.com, Gurgaon

- Led a 7-member team in developing a multi-module Android app architecture using Clean and MVVM principles.
- Built a Compose-based app with a single activity, managing dependencies across modules with Hilt.
- Developed custom SDKs for network handling (Network SDK) and analytics integration (Analytics SDK).
- Integrated React Native and Native technologies to enhance app capabilities.
- Implemented advanced asynchronous handling with Coroutines and Flow, consistently improving team efficiency and adaptability.

03/2020 - 07/2022

Chief Engineer

OnePlus, Hyderabad

- Developed UPI 2.0 Mandate module for OnePlus Pay, enabling future payment scheduling.
- Utilized LiveData, Retrofit, and AXIS Bank Olive SDK for real-time updates and UPI API integration.
- Built modules with a focus on architecture, design patterns, and reusability.
- Applied MVVM with data binding, Coroutines, and Flow for asynchronous operations.
- Prioritized UI lifecycle management and implemented system monitoring, recovery, and optimization.

11/2019 - 02/2020

Technical Lead

Evoke Technologies, Hyderabad

- Designed a truck lorry movement monitoring app.
- Created a product prototype, later developed as an Android app.
- Mentored 3 interns in software development.
- Developed a 3-year roadmap based on client requirements.
- Crafted a user-centered design document.

06/2016 - 10/2019 **Senior Software Engineer**

GGK Technologies, Hyderabad

Pair Up Dating:

- Focuses on community safety by swiftly removing disruptive users.
- Simplified profile setup with concise categories.
- Advanced matching algorithm using Kotlin, interest tags, and user categories.
- Tech stack: Kotlin, Room, Dagger 2, Google Play Services, Retrofit, RxJava2, Azure Storage, SendBird SDK, Twitter SDK, Firebase (Cloud Messaging, Crash Reporting).
- Features in-app purchases and diverse technologies for a better dating experience.

Day One:

- Robust journaling app for quick entries and cloud sync.
- Uses Firebase (Cloud Messaging, Analytics, Crash Reporting), Markdown, in-app purchases, ZIP file processing.
- RecyclerView with section headers, GridLayout Manager, custom calendar, text/image editor, swipe-to-close, WebView, JobScheduler.
- Integrates Maps and Darksy Weather APIs for added functionality.

08/2013 - 05/2016 **Software Engineer**

FindFacts Innovation Center, Hyderabad

- Orchestrated the end-to-end development and deployment of multiple Android apps, overseeing every phase of the process.
- Conducted thorough testing to ensure efficient issue resolution and optimal app performance before final deployment.
- Developed custom mobile applications using native technologies, showcasing adaptability and versatility.
- Acquired expertise in MVP coding architecture and various design patterns, enhancing coding proficiency.
- Demonstrated a consistent commitment to utilizing the Android SDK, resulting in the production of highly effective and nuanced content.
- Provided ongoing code maintenance and system upgrades, ensuring maximum performance and longevity.
