Bengaluru, India

Experience

Aug 2022 - Sept 2024
Bengaluru, India

Lead Software Engineer, Persistent Systems

Developed a rule engine which modified the records based on the rules defined by adding extended functionalities to MDM tool using Java and Spring Framework.

I enriched and reconciled data from different sources to formulate a single master record, generate reports and send them over email, also automated the process so that further enrichment can take place without manual interventions.

Tech Stack – Java, Spring boot, WQL, JDBC

Feb 2022 - Aug 2022
Bengaluru, India

Trainee Decision Scientist, Mu Sigma

Used Java and Python to develop web scrappers to extract data and performed language transformations wherever needed. Also looked into the client's business process to find out the bottlenecks and provide solutions for the same using process mining tool (Celonis).

Tech Stack – Java, Celonis, PQL, Python, JDBC

Jan 2020 - Feb 2022
Bhubaneswar, India

Software Engineer, Capgemini

Used Duckcreek tool to manage the entire policy life cycle from quote to bind to issue.

Worked on the back-end for the insurance UI, to calculate premium differently in tiered structure based on live data input from the user.

Chennai, India

.Net Trainee, Capgemini

Created a dummy project using .Net and Angular, to create an Online Banking System from scratch. It included back-end, front-end, and data layers.

Tech Stack – Duckcreek, SQL, C#, SQL, MVC

Jul 2019 - Jan 2020
Bhubaneswar, India

Robotics Process Automation Developer (Paid Intern), HighRadius

Automation of Claims from Customer Portals to company's solution software using Java Spring Framework, Hibernate and SQL. Used Java to automate the process of crawling into client's portal by logging into it, finding the required data and then extracting data from UI/pdf/emails to company's solution software. Used selenium for various clients.

Tech Stack – Java, Spring boot, Spring JPA, SQL, Jira, GIT, PuTTY

Education
Bhubaneswar, India
Jul 2016 - May 2020

Bachelor of Technology (B. Tech), KIIT University

Computer Science & Communication Engineering
CGPA - 7.20

Project

Inventory Management System

Developed a comprehensive Inventory Management System to facilitate efficient inventory control and management. Implemented Restful APIs using Java with Spring Boot to handle inventory transactions such as deduction and addition based on various operations like order fulfillment, restocking, and product returns. Utilized concurrent data structures to ensure thread-safe operations and prevent data inconsistencies. Integrated with a relational database for storing inventory information and provided thorough documentation covering setup instructions and API specifications.

Key Technologies - Java, Spring Boot, Restful APIs, Concurrency Control, MySQL

Skills

Java, DSA, Spring boot, MySQL, Python, C#, Angular

Tools

Eclipse, MySQL Workbench, GIT, Jira, IBM Product Master, Celonis, Duckcreek, Visual Studio
