

MOHAMMED SHAHBAZ

Email: mdshahbaz7797@gmail.com

Mobile: 9347567797

Professional Summary:

- Having 4+ years in Power BI as Developer on development of Reports and Dashboards using Power BI, SSAS DAX and MS SQL Server.
- Knowledge on analyzing the data, planning and design of power bi report in power bi desktop
- Good Experience on power BI Desktop including get data, identifying the relationships, create calculated columns measures using DAX.
- Good Experience on Power BI Service including Dashboard design & sharing with users.
- Having good experience in Power query, Power pivot and Power view for creating the effective reports and dashboards in Power BI desktop.
- Good knowledge of Relational Database Management Systems with experience SQL Server.
- Developed the Power bi reports using different types of data sources like SQL server, excel, cube.
- Good knowledge in power bi optimization techniques.
- Extensive knowledge in various reporting objects like measures, hierarchies, filters calculated fields, groups, & parameters in power bi.
- Retrieve Data from Databases SSRS developers optimize SQL server queries to efficiently and quickly retrieve data.
- Hands on experience in RLS in power bi.
- Strong experience in design User interactive and personalized visuals in power bi desktop.

Work Experience:

- Worked as a Software Associate in Nihira Business Solution from Sep 2019 to Dec 2021.
- Worked as a Software Engineer in Saama Technologies from Jan 2022 to April 2023.
- Working as a power Bi Developer in Innosoft Datalinks from May 2023 to Till Date.

Educational Details:

MSC (Computer Science) | From Mayur College of Information & Technology.

Certifications:

Microsoft Certified (PL-300) : Power BI Data Analyst Associate.

Project Summary:

Project #1

Project	:	Accredo
Client	:	Johnson and Johnson
Team Size	:	5
Skills	:	Microsoft Excel, Power Bi.
Duration	:	Sep 2019 to Dec 2021

Description:

Johnson and Johnson are a FORTUNE 500 global pharmacy and utility distribution and supply chain Solutions Company. It's operating nearly 800 locations around the world and strong relationships with industry- leading suppliers in your corner to help your business stay ahead of the competition. The project implementation is focused on developing Power BI Dash Boards for Johnson and Johnson department. Reports help the business to estimate the inventory information in warehouse and sales in various outlets.

Responsibilities:

- Understanding the DAX functions in Existing Data model.
- Responsible for gathering business requirements and technical specifications from the user.
- Implementing new Power BI reports based on sample output file for their respective requirements.
- Data Analytics and Visualizations using Microsoft Excel, power Bi for construction works.
- Create mappings from source to target columns with transformations and filters consideration from data model.
- Involved creating effective reports, dashboards, and publishing into Power bi service.
- Creating the roles for the dashboards, sharing the developed dashboards to the client in powerBI.
- Developed best practices for database design and development activities.

Project # 2

Project	:	Hasbro
Client	:	Hasbro, USA
Team Size	:	6
Role	:	Power BI Developer
Skills	:	Power Bi, SQL, SSAS
Duration	:	Jan 2022 to April 202

Description:

Hasbro, Inc. is an American multinational toy and board game company founded in 1923 with headquarters in Rhode Island, United States. Hasbro acquired the trademarks and products of Kenner, Parker Brothers, and Milton Bradley. Hasbro provides different products like Toys, Puzzles, Board games, war games, Sports equipment. The company has presence in 40 countries and sells products in more than 150 nations.

Responsibilities:

- Involved discussion with business users and provide technical guidance for Power BI Desktop and Power BI Service.
- Created different types of reports using Power BI desktop, like vertical and cross tab reports and dashboards.
- Created reports using Power BI desktop which includes drillings, sorts etc.
- Driving calls with clients to update the progress of project activity.
- Created filters and apply conditional formatting based on the user requirement.
- Created charts like Lines, Pies, Scatter, and Tree map, Slicer, bar chart, & Funnel chart etc.
- Created measures and columns in Power BI Desktop.
- Created scheduling the reports using Data Gateway.
- Ensure timely delivery & quality of delivery by adhering to Quality Process.

Project #3

Title	:	Banking
Client	:	ABN-AMRO Bank, Netherland
Role	:	Report Developer
Environment	:	Power BI, Excel, SQL, SSAS, SSRS
Team Size	:	8
Duration	:	May 2023 to Till Date.

Description:

The overall objective of this project is to develop and maintain a complete data Warehouse system for ABN AMRO BANK. This project is to design and develop new towers for IT and Service Management processes. The activities of the project ranged from data extraction, transform and loading into the data warehouse through data stage to developing end users. The Reporting tool provides on-demand reports to business users who use the information to study usage patterns.

Responsibilities: -

- Involved in requirements gathering and preparing technical documents.
- Connect, import, shape, and transform data for business intelligence (BI).
- Experience in developing Visualization reports and dashboards using Power BI
- Visualize data, author reports, and schedule automated refresh of reports.
- Retrieve Data from Databases SSRS developers optimize SQL server queries to efficiently and quickly retrieve data.
- Implemented Visual Level, Page level, report level filters and pinning in dashboards.
- Written simple DAX calculation as per the requirement to maintain business measures.
- Worked on report permissions and dashboard permissions to provide access to different users.
- Used Quick insights to get various types of visuals to match the requirements.
- Created charts like Lines, Pies, Scatter, and Tree map, Slicer, bar chart, & Funnelchart.
- Experience on relationship tab to provide cardinality between fact and dimension tables.
- Involved creating effective reports, dashboards, and publishing into Power bi service.
- Creating the roles for the dashboards, sharing the developed dashboards to the client in powerBI.
- Developed best practices for database design and development activities.

Declaration:

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
