INTRODUCTION

I am a passionate Data Scientist and Machine Learning enthusiast with a keen interest in the realms of Machine Learning, Deep Learning, NLP, and Large Language Models (LLMs). My journey is fueled by a desire to explore and innovate at the crossroads of data and technology, contributing to cutting-edge advancements in the field.

EDUCATION

•Indian Institute of Information Technology, Dharwad

2021-25

Bachelor of Technology in Data Science and Artificial Intelligence

CGPA: 8.19

•Narayana Junior College - Senior Secondary

2019-2021

Andhra Pradesh Board of Intermediate Education, State

Marks : 978

PROJECTS

•Emotion Recognition in Multiparty Conversation

- Built a model for Emotion Recognition in Conversation using commonsense information using COMET.
- Used MELD dataset consisting of 1432 conversations(9989 utterances).
- Got a good Weighted F1 score of 61.69 against State of the Art model's score of 65.4.
- Technical Skills: TensorFlow, Feature extraction, Finetuning, Python, Pandas, Numpy

•Personalized English exercise recommendation system

- Developed an English exercise recommendation system, using user demographics and mistake history to provide personalized exercises based on Grammar, Vocabulary, Pronunciation, and Fluency.
- Built a UI with Streamlit and created synthetic data mimicking real-time scenarios to personalize user exercises and monitor progress.
- Designed a user dashboard to visualize progress and highlight areas for improvement using custom data analytics and visualization.
- Technical Skills: Langchain, RAG, LLMs, Data Classification, Api, Python, Data Visualisation, Numpy

•Langchain Agent using GraphRAG

- Developed a GraphRAG-based question answering system with Neo4j for accurate and low-hallucination responses.
- Integrated SERP API and DataFrame Agent for querying local CSV files and web data effectively.
- Leveraged Microsoft's LIDA for dynamic visualization and automatic graph generation of CSV datasets.
- Technical Skills: Langchain, Python, Data Augmentation, Data Visualisation, Numpy

INTERNSHIP

•Vocab.AI Pvt. Ltd.

July 2023 - March 2024

ML Intern

Hubli

- Explored the areas of the Large Language Models using Langchain
- Created a Chat bot which identifies the customer problem and follows the SOPs of the company. Added chat history to the bot memory so that User gets real time conversation Experience
- Connected an External database to the chat bot to retrieve the customer information.
- Fostered open communication and collaboration, encouraging active participation and creating an enriching learning environment.
- Received positive feedback for dedication and simplifying complex concepts

TECHNICAL SKILLS AND INTERESTS

Languages: Python, SQL, C/C++ (solved 250+ problems in Leetcode).

Libraries : C++ STL, scikit learn, numpy, pandas, matplotlib, Seaborn

Frameworks: Langchain, Pytorch, Tensorflow, Hugging Face, Git

Cloud/Databases: Relational Database(mysql), Vector Databases(Chroma), Graph Database(Neo4j)

Relevant Coursework: Data Structures, Design and Analysis of Algorithms, DBMS, Operating Systems, Object Oriented Programming, Software Engineering, Machine Learning, Natural Language Modelling, GenAI, Devops

Areas of Interest: Machine Learning, Deep Learning, Natural Language Processing(NLP), Computer Vision(CV), Data Analysis, Prompt Engineering, Large Language Models(LLMs),large multimodal models(LMMs)

Soft Skills: Problem Solving, Self-learning, Collaboration, Presentation, Adaptability, Time Management
