ABOUT ME

Professional Full Stack Blockchain Developer with 2+ year experience in Software Development. I am involved in Smart Contract Development, MERN Stack Development, and Dapp's Development.

EXPERIENCE

April 2022 - Present

Full Stack Blockchain Developer

Flexsin Technologies

Noida(Remote)

- Created and managed smart contracts using Solidity.
- Developed contracts on ERC20, ERC721, ERC721a, and ERC1155 for EVM-compatible chains
- Integrated smart contracts with React.js using ethers.js and web3.js
- Developed REST APIs for smart contract functionalities using Node.js
- Wrote and tested smart contract test cases with Hardhat
- Conducted research and analysis for new project requirements
- Set up private blockchains with multiple nodes and local IPFS
- Integrated digital wallets into front-end applications
- Set up Hyperledger Fabric networks, deployed chaincode, and created new organizations with CA
- Currently learning Rust for Solana and Golang to expand my expertise in blockchain development.

EDUCATION

University of Mumbai

Bachelor of Science(Information Technology)

2018-2021

Project -
RailwayX - Train ticket booking system

TECHNICAL SKILLS

Solidity

Hyperledger-fabric

Node.js

React.js/Next.js

RESTAPI

web3.js/ethers.js

Go/chaincode

Hardhat/Truffle

Private Blockchain/IPFS

Blockchain

LIVE PROJECTS

May 2024 - Present Strings Wallet

- Developed backend with Node.js, MongoDB, and Express
- Created and integrated smart contract functions for REST APIs
- Implemented Socket.IO for transaction notifications
- Designed ERC20 token reward system for user interactions (referrals, likes, shares)
- Enabled peer-to-peer token transfers within the application ecosystem

June 2023 - Jan 2024 Data-Management

- Setup of Hyperledger-fabric network on docker container and create chaincode functions with go-lang, deploy chaincode on the channel for different orgs.
- Interacting chaincode functions with REST APIs on Node.js
- Managing data integrity issue on backend and hyperledger.
- Creation of user wallets on platform to validate them.

Feb 2023 - Nov 2023 GameSphere

- Creation of Smart Contract - Presale, ERC-20, NFT Marketplace and deploying on BSC testnet and Polygon Mumbai
- Making testcases of smart contract with hardhat.
- Integration of wallets on react.js through wagmi.

Nov 2022 - Present NFT Marketplace

- Creation of Smart Contract - NFT marketplace, Auction, FractionalNFT and deploying them on Hedera Hashgraph.
- Interacting Smart Contracts with Hashgraph libraries and testing them on React.js.
- Integrating HashPack Wallet with a web application.

April 2022 - Aug 2022 Fully Defi Web-Application

- Handling and creation of all Smart contract on this project.
- Smart contract of Staking with Rebase Functionality.
- Handling all Back-end operation & Interacting on React with smart contract functionalities with web3.js/ether.js.
- Setting up different Digital wallets like MetaMask, Trust wallet, Coinbase, etc. on the Web App.
