

B SHASHEENDRA**Mobile:** +91 7842789830**E-Mail:** shashindrab@outlook.com**Professional Summary:**

- Experienced data engineer with over 3.5 years of professional background in analyzing and developing various projects utilizing Big Data and AWS services. Skilled in Python, SQL, and Spark technologies.
- Good Exposure on Bigdata Ecosystem like HDFS, Hive, Sqoop, Spark, Python and Spark 2
- Experience in working with the AWS services like EMR, S3, Ec2
- Conducted data analysis and transformations, tasks like filtering, sorting, and aggregation, using SQL, Hive, and Snowflake
- Extensively worked in Complex Data processing/engineering using Spark Data frames and API's, also worked on different File Formats like Avro, Parquet resolved issues in processing data.
- Developed comprehensive ETL data pipelines from start to finish utilizing tools like Airflow. Additionally, skilled in creating tailored Python automation scripts, HQLs, and shell scripts to meet specific business requirements.
- Experience in analysing large datasets and finding patterns and insights within structured and semi structured data.
- Highly motivated team player with a knack for adapting to emerging technologies. Exhibits strong independent work capabilities and excels in communication, interpersonal relations, problem-solving, and analytical skills.

Technical Skills

Bigdata Tools	:	Pyspark, Hive, HDFS, Sqoop
AWS Services	:	AWS EMR, S3, Ec2
Data Warehouse	:	SQL, Snowflake, Hive
Scheduling Tools	:	Airflow
Language	:	Pyspark, Python, SQL

Professional Experience

Organization	Designation	Duration
Maveric Systems, Pune	Software Engineer	March 2022 to Mar 2023
Amazon, Hyderabad	Software Analyst	November 2018 to March 2021

Maveric Systems

BCL

- Client: Nike
- Team size: 7
- Technology: Pyspark, Spark-SQL, Python, , AWS S3, Airflow

Description:

In this project, Supply chain data of the core metrics tables being transformed based on business logic using Spark and SQL transformations on the EMR cluster, Whenever the job runs data will moves from the layer to layer on s3 bucket and all the views and tables created on Snowflake warehouse, End team consumes the data and generates the metric Dashboard. All the jobs will be orchestrated using Airflow scheduler tool.

PYTHON AUTOMATION

- Client: Nike
- Team size: 1
- Technology: Python, XML, Tableau server client library

Description:

The following project aim is to automate all the Tableau server activities like publishing workbooks to the sites and assigning group permission to the users. Script will check the attributes (users, projects, groups) on the site, if it does not exist it will create on the user instruction from the XML file.

Amazon:

SSBI Enhancement Project

- Technology: Bigdata Ecosystem, Python, SQL, AWS, Airflow

Description:

In this Project, I did enhancements to the existing pipelines on customer requests which includes SQL Enhancements, Python code changes, shell scripting changes and Airflow jobs modifications. I have also provided production support for all the applications running and taking necessary actions for any kind of issue that occurs in EMR cluster and Airflow.

Atlas

- Project Name: Atlas [Amazon Robotics]
- Technology: Python

Roles and Responsibilities:

- Design and deployed the Atlas application with Python using Pandas, NumPy, Matplotlib libraries.
- Monitor the application/request processing.
- Able to systematically escalate problems or variance in the information to the relevant owners/teams according to processes and standard.
- Building reusable code and libraries for future use
- Used data structures like directories, tuples, object-oriented class-based inheritance features for building the Atlas application.
- Worked on debugging, Bug fixes in the application.
- Designing data base tables and structures using SQL
- Creating views, Functions, stored procedures using SQL

Academic Credentials

- Bachelor's degree from Osmania University, Hyderabad
- Intermediate from Sri Gayatri Junior College, Hyderabad
- High school from Kakatiya High school, Nizamabad, Telangana

Personal Profile

Gender	:	Male
Marital Status	:	Single
Nationality	:	Indian

I hereby declare that the above information provided is true to the best of my knowledge & belief.

Place: Hyderabad
