Summary

As a detail-oriented and technically skilled Digital Forensics Analyst, I have a proven track record of investigating digital assets and mitigating cyber threats. Proficient in utilizing digital forensic tools such as EnCase and FTK, along with expertise in file systems analysis including NTFS, FAT, HFS+, and Ext4. My capabilities extend to network forensics and packet analysis, mobile device forensics on iOS and Android platforms, incident response, evidence handling, as well as data recovery and extraction. With my extensive knowledge of forensic methodologies, tools, and technologies, I excel in uncovering crucial digital evidence to support investigative processes.

Work Experience

DIGITAL FORENSIC ENGINEER at PINACA, CHENNAI 2022 - 2024

A skilled and thorough digital forensic analyst with two years of experience collecting, storing, and analyzing digital evidence. adept at using state-of-the-art forensic software, such as FTK, EnCase, MobileEdit, and Cellebrite, to support legal investigations and financial fraud cases. A track record of tight collaboration with law enforcement, thorough forensic investigation, and production of easily interpreted and interpreted results for use in court. Employed tools like FTK, EnCase, and Cellebrite to conduct forensic examinations on digital devices, including network systems, hard discs, and mobile phones. collected, analyzed, and documented digital evidence for various court cases while collaborating with law enforcement. Used forensic techniques, such as data extraction, malware analysis, and imaging, to support investigations.

- Knowledge of appropriate forensic investigation techniques:

Shows a thorough understanding of proper forensic investigation techniques, especially when dealing with compromised system images or files. Proficient in using meticulous methodologies to extract, preserve, and analyze digital evidence, ensuring the integrity of investigative procedures.

- Analysis and Reporting:

Proficient in analyzing investigative findings and creating fact-based technical reports covering specific periods. Capable of converting complex technical data into comprehensive reports suitable for legal proceedings.

- Chain of Custody and Section 65B Compliance:

Possesses a strong knowledge of policies and procedures regarding the chain of custody, ensuring the admissibility of digital evidence in legal proceedings. Familiarity with Section 65B practices reinforces a commitment to legal standards for the acceptance of electronic evidence.

Cyber Security Trainer at Livewire, Trichy - 2020

Developing Training Programs: Design and deliver cybersecurity courses that cover topics such as network security, threat analysis, and ethical hacking. Hands-on Training: Provide practical, scenario-based training using real-world security challenges. Assessing Learning: Evaluate trainees through assessments, quizzes, and hands-on exercises to ensure skill mastery. Staying Current: Keep updated on the latest cybersecurity trends, tools, and threats to provide relevant content. Consultation: Advise organizations on best practices for cybersecurity policies.

Education

M.Sc in Cyber Forensic And Information Technology from University of Madras - May, 2019 - Mar, 2021
Graduated with 7 CGPA

Internship - Company Name: ETDC (Electronics Test and Development Center) Position: Intern Duration: 10 days

Web application vulnerability analysis was performed using industry-standard tools and techniques. Performed penetration testing to detect and address security flaws in web applications. Website quality was evaluated using the Government of India Web Guidelines (GIGW) to ensure compliance and usability.

Company Name: Cycatz Position: Intern Duration: 6 Months

Vulnerability Assessment and Penetration Testing (VAPT) was performed on web applications using industry-standard tools such as Burp Suite, OWASP ZAP, and Nmap. Identified and analyzed security vulnerabilities such as SQL injection, cross-site scripting (XSS), and authentication bypass to evaluate web applications' overall security posture.

Postgraduate Diploma in Digital Cyber Forensics & Related Law from University of Mumbai, Mumbai - Apr, 2018 - Mar, 2019
Graduated with 70 %

BSC in Information Technology from Jamal Mohamed College - Mar, 2015 - Apr, 2018
Graduated with 70 %

Technical Skills

- **Digital Evidence Collection:** Expertise in collecting and preserving digital evidence from computers, mobile devices, and storage media while ensuring adherence to chain of custody protocols.
- **Data Recovery & Analysis:** Proficient in using forensic tools such as FTK, EnCase, Cellebrite, MobileEdit, and Google Takeout for data recovery, analysis, and reporting.
- **Incident Response:** Skilled in identifying, analyzing, and responding to security incidents, including data breaches and cyber-attacks, using advanced forensic techniques.
- **Imaging & Cloning:** Experienced in creating forensic images and clones of digital devices for evidence preservation and analysis.
- **Mobile Forensics:** Specialized in extracting and analyzing data from mobile devices using tools like Cellebrite and iTunes Backup, focusing on SMS, call logs, app data, and other relevant information.
- **Email Forensics:** Experienced in analyzing email headers, attachments, and metadata to trace communication patterns and identify potential fraudulent activities.
- **Malware Analysis:** Capable of identifying and analyzing malware and other malicious software to understand their impact on compromised systems.
- **Cybercrime Investigation:** In-depth knowledge of cybercrime investigation techniques, including tracking digital footprints, analyzing network traffic, and recovering deleted files.
- **Encryption & Decryption:** Familiar with encryption technologies and methods for decrypting secured data to access hidden information.

Analytical Skills - Critical Thinking, Attention to Detail, Problem-Solving, Log File Analysis, Malware Analysis

Soft Skills - Effective Communication, Teamwork, Adaptability, Ethical Judgment, Stress Management

Voluntary Experience

Department Chairman - May, 2017 - Mar, 2018

As department chairman, I oversee the academic and administrative functions of Jamal Mohamed College's Information Technology department, ensuring that departmental activities and programs run smoothly. Lead a faculty team, offering guidance, support, and mentorship to ensure high-quality education and research outcomes.

Recognitions

TN POLICE HACKATHON - Nov, 2019 - Nov, 2019

During the TN Police Hackathon, I actively participated in tackling the various challenges posed by the organizers. One of the highlights of my involvement was the creation of novel technological solutions to these challenges. My team worked hard to understand the problem statements, generate creative ideas, and implement practical solutions based on our technical skills and knowledge.

Certifications

Fundamentals of Cyber Crime and Cyber Forensics - Feb, 2020 - Feb, 2020

Teaching about cybercrime, such as hacking, phishing, malware attacks, identity theft, cyberbullying, and online scams. Investigating cybercriminals' motivations and intentions, including financial gain, data theft, espionage, activism, and service disruption. Understanding current cybercrime trends, emerging threats, and cybercriminal's changing attack method.
