Education

ITER' S'O'A University

Bachelor of Technology in Computer Science

Aug. 2016 – May 2020

CGPA – 8.8

Experience

Capillary Technologies

Software Development Engineer - 2

May 2024 – Present

Bangalore, Karnataka

Loyalty Plus: Milestones/Streaks | React Redux Webpack Jest React-testing-library

- Improved page load performance by **chunk splitting** (vendor and main chunks) into multiple smaller chunks, reducing chunk sizes by leveraging compression algorithms and lazy loading of components.
- Upgraded two key projects to React 18 and Webpack 5 and conducted thorough testing to resolve compatibility issues.
- Unified milestones and streaks by ensuring component re-usability, optimizing both **local and global state management**, while maintaining 100% backward compatibility with **90% test coverage** and automation
- Played a pivotal role in brainstorming with cross-functional teams, including product and design, to revamp tightly coupled 4-step milestone product to a seamless flow.
- Metrics and On Call Contribution: Tracked real-time API Endpoint - errors(4xx+5xx), response time, throughput & apdex score and incidents alerts using New Relic and Site 24x7.

Gyansys Inc.

Software Development Engineer - 1

Sep. 2020 – April 2024

Bangalore, Karnataka

Insta Quotes | JavaScript React Redux Webpack Jest React testing library Web Vitals Intl

- Developed fully responsive web pages incorporating practical expertise in Web Accessibility standards, including WCAG 2.1/2.2 AA compliance and ARIA implementation. Ensured optimal performance and user experiences across cross platforms, encompassing desktop and mobile devices.
- Co-developed 10+ custom Typescript/React web components, reducing the development time for modular applications
- Actively contributed to the code base, including feature additions, restructuring, refactoring, migrations, and improved test pass cases from 85% to 96% for robust code quality.
- Maintained Core UI library, used across multiple projects, resulting in consistency in design and a 10% reduction in development time.
- Enhanced web vitals performance by optimizing First Contentful Paint (FCP) and Time to Interactive (TTI) metrics, resulting in a notable improvement of 12%.

ARS Application | Typescript React Jest React-testing-library Atomic Design NodeJs MongoDB

- Orchestrated end-to-end garment go-to-market operations and inventory management processes, streamlining operations
- Redesigned and engineered the auto-replenishment engine, transitioning from a pull to a push mechanism.
- Achieved a 13% increase in new SKU launches in 2 months by releasing a remodeled engine.
- Designed and developed the modules using microservices architecture, including Web API/REST API development, OpenID Connect, and OAuth, enable businesses to keep track of distributor's data and stock

UAWCAS | Azure DevOps Function Apps .NET Core Azure Active Directory

- Spearheaded a comprehensive migration of a legacy monolith application to a cloud-based microservices architecture, leveraging Azure services, App Services, and Azure Functions.
- Functionalized modular components for overtime management, transfer, and shift preference request management, views and admin management, handled custom validations, dynamic data handling
- Engineered separate rule engine using .Net Core for handling multiple eligibility checks involved in business rules

Technical Skills

Languages: JavaScript(Es6, Ecma20), Typescript, HTML5, CSS3, C#, SQL

Library/Framework: React.js, Node.js, React-testing-library, Jest, Redux, Antd, Tailwind CSS, Webpack, Babel, ES6 Modules, Hooks, .NET Framework 4.5 above, .NET Core, Entity Framework, MongoDB

Others: Problem Solving, Troubleshooting, Data Structures and Algorithm, Atomic Design, Object Oriented Design, SOLID Principles, Microservices Architecture

Tools Technologies: Git, Site 24*7, New Relic, Grafana, Docker, K8, Azure services
