

ShikhaRana

Blockchain Developer

shikharana192@gmail.com

9990718762

LinkedIn: <https://www.linkedin.com/in/shikha-rana-32091513b/>

- 3 years of experience in blockchain and Nodejs.
- Experience in Defi Projects.
- Experience in developing and implementing applications on layer1 and layer2 of blockchain.
- Strong knowledge on blockchain technology like Bitcoin and Ethereum blockchain, Binance Smart chain and other blockchain also.
- Experience in wallet integration.
- Experience in integration with smart contract using web3.js.
- Knowledge on cryptography, digital signatures, NFT, Defi, Dapps, smart contracts, centralized and decentralized exchanges, staking, consensus algorithms, Ethereum standards (ERC20, ERC721, ERC1155) .

KeySkills

- HTML
- CSS
- Javascript
- C
- C++
- Java
- Solidity
- MySql
- Data Structures
- Algorithms
- Ethereum
- web3.js
- Nodejs

Professional Experience

Lead Blockchain Developer and Backend Developer

CoinCred | August 2023 – Present

- Lead the development of the CoinCred centralized exchange project.
- Implemented spot trading and P2P trading functionalities using Node.js and MongoDB.
- Developed a wallet system supporting Ethereum, BSC, and Polygon networks.
- Implemented wallet integration for GYR and Sanatani (BEP-20 tokens).
- Worked on the VYUG Wallet, including the implementation of deposit and withdrawal functionalities for Ethereum-compatible blockchains.
- Collaborated with cross-functional teams to optimize blockchain solutions, enhancing scalability, security, and user experience.
- Conducted code reviews and implemented best practices to ensure the reliability and security of exchange

Blockchain Developer and Backend Developer

Awapal Solutions | February 2023 – August 2023

- Developed and integrated Decentralized and Centralized Exchange platforms on Binance Smart Chain, implementing smart contracts and connecting them with web3.js.
- Created and deployed a Payment Smart Contract on Binance Smart Chain and integrated it with web3.js. Also developed a USDT Payment Smart Contract on the Tron network.
- Designed and deployed BEP-20 token smart contracts, ensuring secure and efficient token transactions.
- Collaborated with cross-functional teams to optimize blockchain solutions, focusing on scalability, security, and user experience.

Blockchain Developer

Mobiloitte Technologies | October 2022 - February 2023

- Developed and deployed NFT marketplace smart contracts, including NFT generation and staking contracts, ensuring secure and efficient digital asset transactions..
- Contributed to the development and implementation of blockchain solutions using Hyperledger Fabric, focusing on enterprise-grade applications.
- Created and optimized ERC-1155 marketplace smart contracts, facilitating multi-token transactions and enhancing marketplace functionality

Blockchain Developer

Brocoin Network | January 2022 - September 2022

- Developed the blockchain platform **Brocoin**, with **BRON** as the native cryptocurrency.
- Worked on **Brocoin's** peer-to-peer payment network, **broln**, ensuring seamless and secure transactions.
- Implemented the backend software for **broln**, named **brond**, which serves as the core backend for the network.
- Gained experience working on various open-source projects, contributing to the broader blockchain community.
- Worked on the **Bitcoin** blockchain and its layer 2 solution, the **Lightning Network**, enhancing transaction speed and scalability.

Education

B.tech in computer science engineering

MVN University at Faridabad | August 2014 - July 2018

- 4th year / 8.47 CGPA
- Secured 2nd rank in graduation

10th

Rawal Convent School at Faridabad

12th in Science

Rawal Convent School at Faridabad

Certifications

- Java Certificate - Done core and advanced java coaching from Ducat faridabad
- Ethereum and Solidity certificate - Completed a online course from udemy.
