

Shiksha Bhat (Serving Notice Period)

Database Administrator

I have around 7 Years of total work experience working with service based and product based organizations. I have worked with an international bank as well (UBS) and currently working with Teradata. I understand the importance of my roles and responsibilities within an organization and providing best practices for implementation and ongoing support of databases. I am looking for an opportunity where I can explore and work on new different technologies which will capitalize my technical skills and abilities.
