Summary

Android developer with 2 years of hands-on experience in building high-quality mobile applications using Java and Kotlin. Expertise in integrating REST APIs, handling background services, and working with Firebase and Google Cloud services. Proficient in implementing MVVM architecture, optimizing performance, and creating engaging UI/UX animations. Strong knowledge of asynchronous programming with RxJava and Kotlin Coroutines, with a focus on delivering responsive and scalable applications.

Professional Experience

Junior Android Developer - 7System Technology Pvt. Ltd. (Onsite)

February 2024 – Present

- Collaborate in the development of a **CRM** application primarily using **Java** for Android.
- Implement **Google Maps SDK** and **Places API** for location-based features and services.
- Integrate **Firebase** products, including **Analytics**, **Crashlytics**, **Firebase Cloud Messaging (FCM)** for push notifications, and **FCM Performance Monitoring**.
- Utilize **RESTful APIs** for efficient data exchange and functionality enhancement within the app.
- Participate in **UI/UX** design improvements to enhance user experience.
- Contribute to code reviews and maintain **version control** using **GitHub**.

Android Developer (Intern: May 2020 – October 2020; Developer: November 2020 – May 2021)

Digibyte Technology – Remote

- Assisted in Android app development primarily using **Kotlin**.
 - Integrated **RESTful APIs** and implemented **Firebase Cloud Messaging** for push notifications.
 - Gained experience in **RxJava** and **UI/UX** design improvements.
 - Led development of Android applications, utilizing Kotlin with **WorkManager** and **AlarmManager** for **background tasks**.
 - Integrated **Google Maps SDK** and **Fused Location Client** for real-time tracking.
 - Optimized app performance with **Firebase Analytics** and **Crashlytics**.
 - Followed **MVVM** architecture for maintainable code.
 - Developed a reusable **API integration** framework, reducing integration time.
-

Technical Skills

- **Languages:** Java, Kotlin
- **Frameworks:** Android SDK, Kotlin Compose (Jetpack Compose), MVVM, MVC
- **APIs & Libraries:** RESTful APIs, Google Maps SDK, Places API, Fused Location Client, Firebase Products (Analytics, Crashlytics, FCM)
- **Background Tasks:** WorkManager, AlarmManager, Services
- **Asynchronous Programming:** RxJava, Kotlin Coroutines
- **UI/UX:** Material Design, UI/UX Animations
- **Version Control:** Git, GitHub
- **Tools:** Android Studio, IntelliJ IDEA, Android Emulator
- **Cloud Services:** Google Cloud Platform, Firebase

Education

Master of Computer Applications (MCA)

CGPA (7.9)

Graphic Era Hill University – Dehradun, Uttarakhand
2024

Bachelor of Computer Applications (BCA)

CGPA (6.9)

Himalayan Institute of Technology – Dehradun, Uttarakhand
2022

Projects

7Sales Application

7System Technology Pvt. Ltd

- Developed a CRM application for tracking FMCG employees.
- Implemented features for employees to mark attendance and apply for leave.
- Enabled admin functionality for real-time tracking of employees' locations and activities.
- Utilized Java and Kotlin, integrated Google Maps SDK, and implemented various Firebase services for data management and notifications.

Tools Villa Application

Digibyte Technology

- Developed an e-commerce application for selling agricultural tools to farmers.
- Implemented features for partial payments, cash on delivery (COD), and online payment methods.
- Enhanced user experience with intuitive navigation and a responsive design.
- Utilized Java and Kotlin for app development and integrated payment gateways for secure transactions.

We Memberz Application

Freelance Project

- Developed a platform for creating photo albums and facilitating group chats among users.
- Implemented features for users to upload images, create albums, and share with friends.
- Integrated real-time chat functionality for enhanced user interaction.
- Utilized Java and Kotlin for app development, focusing on user-friendly interfaces and seamless performance.
