SUMMARY

Results-driven B.Tech graduate in Artificial Intelligence with a passion for leveraging cutting-edge technologies. Seeking a challenging role as a **software developer** where I can apply my strong technical skills, problem-solving abilities, and creative thinking to contribute meaningfully to innovative projects.

EDUCATION

B.Tech in Artificial Intelligence, GH Rasoni College of Engineering and Management 8.21 CGPA, 2020 – 2024
Honors in Data Science, GH Rasoni College of Engineering and Management 2022 - 2024

SKILLS

- | | | | | |
|--------------|---------------------|---------|-------------------|--------------|
| • Core java | • Python | • SQL | • Selenium | • Pandas |
| • NumPy | • Machine Learning, | • Git | • PyTorch | • Linux |
| • Keras | • Data Analysis | • NLP | • Docker | • AWS |
| • Leadership | • Team Management. | • OOP'S | • Problem-Solving | • Analytical |

EXPERIENCE

Software Intern - PhoenixGen Systems Private Limited (Dec 2023 –June2024)

- Developed and integrated **GenAI** models using **Docker** containers and **Flutterflow** for front-end Enhancements, reduced app load times by 40% and boosted user engagement by 25% within three months. Pune, MH
- Utilized **Docker** for version control and to manage dependencies across different environments, enhancing consistency by 50%.
- Created and managed **Dockerfiles** for building custom images tailored to project requirements, reducing build times by 20%.
- Optimized **Docker images** to reduce size by 35% and improve application performance.

Intern - WECHITRA.com (Jan 2022 - Mar 2023)

- Developed and maintained the company website using **WordPress**, resulting in a 50% increase in site traffic within three months. Pune, MH
- Listed and managed over 50+ products on the website, improving the overall user experience and product visibility.
- Analyzed website data** and user behavior to optimize content and layout, leading to a 20% increase in average session duration.

PROJECTS

AI-ASSISTANT (July 2021 - Aug 2021)

- Developed a voice-activated AI assistant for Google searches and music playback. Voice recognition with **SpeechRecognition** and PyAudio **Text-to-speech** using pyttsx3. Technologies used are Python, **NLP Libraries**: SpeechRecognition, **PyAudio**, pyttsx3, pygame.

STUDENT DATABASE MANAGEMENT SYSTEM (Jan 2022 – June 2022)

- Developed a comprehensive system for storing and managing student data. Student registration and data storage Secure access and data integrity User-friendly interface for data entry and retrieval. Technologies used are Database Management System (**SQL**), **Backend Development** (Python), **Frontend Development** (HTML), **Data Security and Encryption**.

CYBER BULLYING PREDICTIVE ANALYSIS ON TWITTER (Jun 2023 – Dec 2023)

- Developed a predictive model to detect and combat cyberbullying on Twitter. Real-time detection of cyberbullying tweets, Use of machine learning algorithms for predictive analysis, Integration with Twitter API for data collection and analysis. Technologies used are Predictive Analysis, **Machine Learning** (Python: Scikit-learn, TensorFlow), **Data Analytics**, Twitter API, **Natural Language Processing**

COURSES

- Foundational Data Analytics, Computer Networks, Operating Systems, AWS, Data Structures and Algorithm.
- Natural Language Processing, DBMS, Soft Computing, Object-Oriented Programming, Artificial Intelligence.
