

SHRAVANYA SUNIL

GENERATIVE AI ENGINEER

+91 7022414663 | shravanyasunildas@gmail.com | Bangalore

Objective

With three years of experience as a system engineer in insurance and service sectors, I specialize in crafting precise PySpark jobs that ensure superior data quality through effective cleansing, manipulation, and transformation. I am Experienced in generative AI tasks, I possess expertise in vector databases, LLM frameworks. I am motivated to advance as a software engineer, applying my technical skills and creativity to develop cutting-edge AI solutions in collaborative team environments.

Experience

TATA CONSULTANCY SERVICES | Gen AI Engineer

2023-Present

- Acquired expertise in AI technologies such as Langchain, AzureOpenAI, and Pandas.
- Worked on an anti-money laundering project by generating narratives derived from transaction data using generative AI techniques.
- Implemented a CSV chatbot for extracting information from CSV documents, utilizing data chunking, tokenization, embedding techniques, and RAG to achieve high accuracy in document comprehension and retrieval.
- Engaged in tasks including text summarization, code explanation, and PDF summarization for various use cases.
- Designed and implemented the backend for a PDF summarization application using Flask.
- Developed a sentiment analysis system that classifies text (e.g., product reviews, social media posts) into positive, negative, or neutral sentiments.
- Collaborated in team settings to conceptualize and implement proof-of-concept projects utilizing generative AI techniques, with a focus on RAG for enhanced data retrieval accuracy

TATA CONSULTANCY SERVICES | Jr Data Engineer

2022-2023

- Experience in writing PySpark jobs to meet specific business requirements and data processing needs.
- Experienced in extracting data from Hive tables to enable downstream processing and analysis.
- Performed comprehensive data cleaning to ensure high data quality and consistency before processing.
- Utilized PySpark libraries and functions to implement complex data transformations and actions
- Implemented data aggregation and filtering techniques using PySpark RDDs and DataFrames
- Loaded transformed data back into Hive tables, facilitating seamless integration and accessibility for further analysis.
- Collaborated with cross-functional teams including data scientists, analysts, and engineers to understand requirements and deliver optimized PySpark solutions.

TATA CONSULTANCY SERVICES | Ops Specialist

2021-2022

- Managed Control-M jobs, calendars, and dependencies for efficient scheduling operations.
- Handling of batch activities, monitoring and maintaining databases, and ensuring that jobs are running smoothly and efficiently
- Resolved Control-M schedules incidents promptly, minimizing business disruption.
- Prioritized and addressed Control-M scheduler issues effectively to meet SLA requirements.

Education

HKBK College of Engineering

2016-2020

BE Civil Engineering (CGPA – 7.8)

Skills

- **Technical Skills:** Gen AI, RAG, Machine Learning concepts, Pyspark, DataFrames
- **Libraries:** Pandas, Numpy
- **Programming Languages:** Python

- **Frameworks & Tools:** Big Data, LangChain, Flask
- **Generative AI Technologies:** OpenAI
- **Vector Databases:** FAISS, ChromaDB, Pinecone
- **Soft Skills:** Analytical thinking, problem-solving, teamwork, effective communication

Certificates

Oracle Cloud Infrastructure Generative AI Certified Professional
Big Data Analytics – Trendytech
