CAREER OBJECTIVES

System Engineer with Two years of Experience, looking for AWS Dev-Ops role the organization that will help me develop my technical skills and expertise so that I can be, not only an asset for the company, but also have a better outlook about myself. I just want to reach the hope of the organization.

EXPERIENCE

System Engineer (Feb 2022 – Jan 2024)

Company – Infosys

Project: DBS BANK and ICICI BANK

- Coordination with team members and tracking the activity.
- Writing Emails and reporting issues to authorized persons.
- Arranging team meetings and sessions regarding migration.
- Discussion with client regarding issues and reporting.
- Preparing documents for further reference.

Data Operator

Company – LCM logistics (Feb 2021 – Jan 2022)

- Maintaining the data up to date.
- Writing Emails and reporting issues to authorized persons.
- Arranging team meetings and sessions regarding migration.
- Preparing documents for further reference.

EDUCATION

- **Bachelor of Engineering** (2015 - 2019)
 - Appa Institute of Engineering and Technology, Kalaburagi.
- **Pre-University college** (2013 - 2015)
 - Chandrakanth Patil college, Kalaburagi.
- **School Education** (2012 - 2013)
 - Millennium school, Kalaburagi.

TECHNICAL SKILLS

- AWS (Amazon Web Services)
 - good knowledge of basic Linux commands
 - good knowledge of AWS services such as IAM, VPC, EC2, S3 and RDS.
 - Identity access management: User, Role and Group creation.
 - Virtual Privet Cloud: Creating VPC, Subnets and Route tables and peering connections.
 - Elastic Cloud Compute: launching Instance, Instance types.
 - Simple Storage service: Bucket creation.
 - Relational Database Service: storing the data.
- GIT
 - Good knowledge of Basic git commands.
 - knowledge of branching, merging, and resolving merge conflicts to maintain clean and organized code repositories.
 - Good knowledge in Git workflows such as Git flow for efficient development processes.
- Docker
 - Skilled in containerization using Docker to package applications and their dependencies into isolated containers.
 - Experience in creating Docker images, managing containers and deploying applications consistently across environments.
 - Knowledge of Docker Compose for defining multi-container applications and orchestrating services.
- Jenkins
 - Hands-on experience in setting up and configuring Jenkins for continuous integration and continuous deployment (CI/CD).
 - Proficient in creating and managing Jenkins Pipelines to build, test and deployment process.
 - Familiarity with Jenkins plugins to extend functionality and integrate
- Kubernetes
 - I have good knowledge on Orchestration tool Kubernetes, like creating pods and replicaset setup docker in Kubernetes.
 - Hands-on knowledge on writing deployment and service file for rollout process.
- Operating Systems: Linux

CERTIFICATIONS:

- AWS Certified Solutions Architect (MicroDegree).
- DevOps (MicroDegree)

PROJECT

- **Deploying Java Application on tomcat server:**
 - The process of building Java application we need two servers
 - At one server I have Git, Jenkins and Apache maven and on another server, I have Docker and Tomcat.
 - As java code is committed in git hub, using Jenkins plugins integrate git and maven for code packaging.
 - On another server I install Docker where I build Apache tomcat image to host the application
 - Once the image is ready configure docker along with email configuration on Jenkins.
 - Final step of building maven project on Jenkins. once the application is exposed properly on web browser then tag the application to docker hub.

DECLARATION

I hereby declare that the above written information is true to the best of my knowledge and confidence

Place: Kalaburagi.
