SKILLS

Languages: C#, JavaScript, TypeScript, SQL

Technologies & Tools: Visual Studio 2022, VS Code, ASP.Net, Angular, JQuery, Postgresql, Kendo UI

WORK EXPERIENCE

Novigo Solutions, Mangalore

May 2023 - Present

Software Engineer

- Contributed to the development of a SaaS product application designed to provide cab facilities and ensure employees' safe arrival at home. The system manages details of employees, drivers, and vendors and supports generating various types of reports.
- Led the migration of a project's user interface from AngularJS to jQuery, significantly optimizing front-end performance, ensuring maintainability, and enhancing usability.
- ASP.NET, REST APIs, Entity Framework, LINQ, Microservices, RabbitMQ, PostgreSQL, JQuery and AngularJS

EDUCATION

NMAM Institute of technology Nitte

Aug 2019 - May 2023

Bachelor of Engineering

CGPA: 8.1/10

PROJECT WORK

- **CookBook (2023):** Implemented a Cookbook application, adhering to best practices and incorporating role-based functionality for admins and users.(.NET, Angular)
- **DatingApp (2023):** Built an application that allows users to register, log in, and interact with one another. Applied object-oriented programming principles to implement different account types and ensure efficient database management.(.NET, Angular)
- **Motor Fault detector (2022):** Developed a machine learning model to predict fault conditions in industrial motors by analyzing key parameters of the signal.(Python, GoogleColab)

AWARDS AND CERTIFICATES

- **Novigo's Rising star :** Awarded for significant contributions to the team and successful project outcomes.
- Full stack development course using .NET and Angular on Udemy.
