

SKILLS

- **Programming Language**-Python , SQL
- **Libraries** - Numpy,Pandas, Matplotlib, Scikit-Learn, Keras
- **Tools** - SQL Server, Power BI , Jupyter notebook,Google Colab
- **Technical Skill** - Data Analysis, Data Wrangling,Feature Engineering, Feature-Selection, Statistical Analysis, Model Evaluation, Machine Learning, Deep Learning, Regression,Classification, Clustering, Dimensionality Reduction, Anomaly Detection,Prediction Modelling, Segmentation, Reporting, Business Intelligence, Data Visualization, EDA,NLP. Basics of Gen AI

PROJECTS

- **Credit Card Fraud Detection** -Developed a machine learning model to detect credit card fraud, achieving a high accuracy rate using algorithms such as Logistic Regression and Random Forest. Implemented data preprocessing techniques and feature engineering to handle imbalanced datasets and improve model performance.
- **Loan Eligibility Prediction** - Designed a loan eligibility prediction model leveraging machine learning algorithms like Decision Trees and Support Vector Machines. Conducted thorough data analysis, feature selection, and model validation to ensure robust and accurate predictions, ultimately enhancing the decision-making process for loan approval.
- **Customer Churn Prediction** - Developed a customer churn prediction model using machine learning techniques such as Logistic Regression and Gradient Boosting. Conducted extensive data analysis, feature engineering, and model tuning to accurately identify at risk customers, enabling targeted retention strategies to reduce churn rates

PROFESSIONAL EXPERIENCE

Accenture Pvt. Ltd.

Application Development Analyst | 2024 - Present

- **Advisor Assignment and Segmentation** - Build a machine learning model to cluster Advisor and assigning them to new client when one advisor leave using KNN ML Algorithm
- **Portfolio Allocation Prediction** - Designed a machine learning model which will predict the allocation of portfolio based on the input provided by advisor such as time frame, risk capacity.
- **Pledge Fixed Rate** - As a Lead of Project, I spear headed the end-to-end development and implementation of the initiative. coordinate d cross-functional teams to ensure seamless integration of features, maintained project timelines, and manage d stakeholder communications.
- **Project Design** - Understanding problem statements, capturing requirements, and various aspects of project design using different documentation such as High-Level Design, Low-Level Design, and Architecture Design.

Application Development Associate

Associate | Jan 2022 - Dec 2022

- Provided statistical analyses and functional reports based on the analysis of data.
- Understanding problem statements, capturing requirements, and various aspects of project design using different documentation such as High-Level Design, Low-Level Design, and Architecture Design.

CERTIFICATES

- IBM Data Science Professional Certificate - Coursera
- Smart India Hackathon 2020

EDUCATION

Poornima College of Engineering ,Jaipur

Bachelor of Engineering (CSE)

2017 - 2021
