---

## Professional Summary

Versatile Software Engineer with over 3 years of hands-on experience in Python. Proficient in the entire development lifecycle, from defining functional specifications to developing, maintaining, and enhancing scalable web applications. Passionate about leveraging Python and related frameworks to solve real-world problems and improve user experiences.

---

## Work Experience

### Associate Python Developer

#### Techolution

*Apr 2023 – Dec 2024 [Serving Notice Period]*

- Worked for GNC Holdings, an American multinational retail and nutritional manufacturing company (Oct - Dec 2024):
  - Developed real-time speech-to-text module utilizing Python, Websockets, and Faster-Whisper.
  - Optimized data streaming processes to enhance real-time transcription speed by 25%.
- Worked for iHeartMedia, an American broadcast media production and distribution company (April 2023 - Sep 2024):
  - Developed new modules and enhanced functionalities using Python and FastAPI, resulting in a 30% improvement in application performance and scalability.
  - Troubleshoot and resolved issues with AWS and RabbitMQ, leading to a 20% increase in system reliability.

### Assistant Professor

#### Invertis University

*October 2021 – March 2023*

- Mentored final-year students in technical and research projects involving technologies such as Flask, Django, PHP, Java etc.
  - Conducted lectures for undergraduate and graduate students, consistently receiving positive feedback for engaging teaching methods.
  - Served as Faculty Placement Coordinator for postgraduate students, achieving a placement rate of over 90% for the cohort.
-

## Technical Skills

- **Languages:** Python, Java, PHP, HTML, CSS, JavaScript
  - **Frameworks/Libraries:** Django, FastAPI, Spring Boot, Flask, NumPy, Pandas
  - **Technologies:** RabbitMQ, AWS, Docker, CI/CD, Git, ORM (SQLAlchemy)
  - **Databases:** PostgreSQL, MySQL, SQLite
  - **Operating Systems:** Linux, Unix, MacOS
  - **Other:** Object-Oriented Programming (OOP), REST API, Microservices, Multithreading, Agile (scrum), Software Development Life Cycle (SDLC), Testing (pytest), Debugging (pdb), Database Schema Design
- 

## Soft Skills

- Team Collaboration & Technical Guidance
  - Analytical & Problem-Solving Skills
  - Communication & Presentation Skills
  - Ability to work independently and in teams
- 

## Projects

### Online Voting System

- Defined project requirements and designed the system architecture, improving data flow efficiency.
- Developed backend services with Django, utilizing OpenCV for face recognition and two-factor authentication, enhancing security.
- Managed PostgreSQL for robust data management and deployed via CI/CD pipelines, ensuring high availability.

### Payroll Management System

- Architected a Django-based system with MySQL, streamlining employee management processes.
  - Achieved a 35% reduction in processing time through code optimization and efficient database queries.
  - Conducted extensive testing to ensure system reliability, employing CI/CD practices for seamless deployment.
- 

## Education

### Master's degree: M. Tech (Computer Science & Engineering)

National Institute of Technology Meghalaya (2015-17) - 88.5%

### Bachelor's degree: B. Tech (Computer Science & Engineering)

Invertis University (2011-15) - 75.15%
