EDUCATION

Netaji Subhash Engineering College Kolkata

Kolkata

Bachelor of Technology in Information Technology

Aug. 2018 – June 2022

EXPERIENCE

Software Engineer

July 2022 — Oct 2024

Kellton

Gurugram

- Developed and optimized web applications using ASP.NET MVC and ASP.NET Core with C#, focusing on performance, scalability, and maintainability.
- Created interactive user interfaces with jQuery and JavaScript, enhancing frontend functionality and user experience.
- Designed and maintained RESTful APIs and microservices for integration with front-end applications and third-party services.
- Utilized Entity Framework and SQL Server for efficient data handling and complex database operations.

PROJECTS

HRMS | *.NET Core, SQL Server, .NET MVC, JQuery, Javascript*

June 2022 – Oct 2024

- Engineered RESTful APIs in .NET Core to enable efficient data integration within HRMS modules, achieving high performance and scalability.
- Developed and optimized SQL Server stored procedures and queries, enhancing data retrieval speed and significantly reducing response times.
- Refined frontend user experience using .NET MVC, jQuery, and JavaScript with an emphasis on usability and a responsive design.
- Orchestrated the modular development approach for the HRMS system, partnering with cross-functional teams to implement features for employee management, payroll, and attendance modules.
- Orchestrated the modular development approach for the HRMS system, partnering with cross-functional teams to implement features for employee management, payroll, and attendance modules.

Smart Lock Backend Development | *.NET Core, Oracle, .NET MVC, JQuery, Javascript* May 2022 – May 2023

- Built RESTful APIs with .NET Core to support seamless data exchange and integration across smart lock modules, achieving optimal performance and reliability.
- Created and fine-tuned SQL Server stored procedures and complex queries, accelerating data retrieval and minimizing latency for real-time lock status and access logs.
- Refined frontend user experience using .NET MVC, jQuery, and JavaScript with an emphasis on usability and a responsive design.
- Improved the user interface with .NET MVC, jQuery, and JavaScript, prioritizing user-friendly navigation and responsive design for effective smart lock management.
- Spearheaded a modular architecture for the smart lock backend system, working closely with cross-functional teams to develop features for access permissions, real-time monitoring, and audit logging.

TECHNICAL SKILLS

Languages: C sharp, SQL (SQL Server, Oracle), JavaScript

Frameworks: .NET Core, NET MVC, jQuery

Developer Tools: Git, VS Code, Visual Studio

Libraries: Entity Framework
