Professional Summary:

DevOps Engineer with over 2 years of experience managing Linux systems and cloud infrastructure. Skilled in automating tasks with shell scripting and tools like Terraform and Ansible. Proficient in deploying applications using Docker, Kubernetes, and AWS services such as EC2, S3, and VPC. Experienced in creating CI/CD pipelines with Jenkins, ensuring security best practices, and managing version control with Git.

Work Experience:

Infosys

Systems Engineer

February 2022 – February 2024

- * Managed Red Hat and Ubuntu distributions, creating and managing users and permissions while automating daily tasks with cron jobs.
- * Installed packages using "apt" and "yum," and streamlined operations through shell scripting.
- * Managed file systems and automated downloads using wget and curl.
- * Proficient in AWS services, including IAM, VPC, EC2, EBS, ELB, Auto Scaling, Route 53, CloudWatch, and SNS. Created and managed custom VPCs, subnets, NAT gateways, and security groups.
- * Deployed EC2 instances and configured DevOps tools like Git, Docker, Kubernetes, Terraform, and Jenkins for CI/CD pipelines.
- * Implemented security best practices using IAM roles and enabling MFA. Configured CloudWatch dashboards to monitor CPU and memory utilization, setting alarms for quick response.
- * Handled network troubleshooting tasks, including EC2 status checks.
- * Created and managed Jenkins pipelines to automate code testing with SonarQube and deploy applications in containers using Docker, ECS, and ECR.
- * Developed scalable infrastructure using Terraform, provisioning VPCs, subnets, route tables, and EC2 instances.
- * Utilized S3 buckets for Terraform backend and version control, building resilient cloud infrastructure with secure access controls.
- * Configured Classic and Application Load Balancers for traffic distribution and managed SSL certificates. Implemented Auto Scaling to dynamically adjust server capacity based on demand.
- * Created regular EC2 backups using snapshots and recovered lost key pairs.
- * Designed complex network architectures, providing internet connectivity to private subnets with NAT gateways. Managed Route 53 for domain resolution.
- * Hosted static websites on S3, integrating with CloudFront for global content delivery.
- * Deployed and managed Kubernetes clusters using AWS EKS, creating pods, replicaset, and managing microservices.
- * Provisioned AWS RDS for SQL database management and utilized S3 for low-cost.
- * Collaborated in daily Scrum meetings to resolve blocking issues, prioritize tasks, and improve DevOps strategies to align with project goals.

Education Qualification:

- * Bachelors of Engineering from Rashtrasant Tukdoji Maharaj Nagpur University (2016 - 2020).
- * HSC from Maharashtra State Board (2014 - 2016).
- * SSC from Maharashtra State Board (2014).

Certifications:

- * RedHat Certified Systems Administrator (RHCSA) | 220-070-940 | May 05, 2022
- * Microsoft Certified: Azure Fundamentals (AZ-900) | 8727B7-2AQ253 | January 20, 2023

Technical Skills:

- * **Operating Systems:** Linux (RHEL8, Ubuntu)
- * **Version Control Tool:** Git, GitHub
- * **CI/CD:** Jenkins
- * **Automation:** Terraform, Ansible
- * **Containerization Tool:** Docker, Kubernetes
- * **Application Server Build Tool:** Maven
- * **Cloud Platform:** AWS, Azure
- * **AWS services:** IAM, S3, ELB, Autoscaling, VPC, CloudFront, RDS, Route53, CloudFront, Lambda, ECR, ECS, EKS

Personal Information:

- * **Name:** Shweta Bhikraj Jivtode
- * **Date Of Birth:** 25/12/1998
- * **Language fluency:** English, Hindi, Marathi.
- * **Marital Status:** Single
