Mo. - 8806950944

Certified and passionate Scrum Master having 4+ years of Scrum Master experience including 13 years of IT industry experience in the java development. Skilled in facilitating Agile development processes and leading cross functional teams to deliver high-quality software products. Seeking opportunities to leverage my expertise in Agile way of working, team collaboration, and continuous improvement to drive organizational success.

PROFESSIONAL PREFACE

- Having more than **13 years** of experience in IT and good experience in **Application development in Java and support activities.**
- Having more than **5 years of experience in Team Leadership**, in the initial 1 year working on waterfall projects and the last **4 years** executing **agile assignments** using **Scrum, Kanban & Jira as Scrum master.**
- Scheduling and allocating work, providing advice and guidance, and resolving problems to meet technical performance and financial objectives
- Coordinate all Scrum Ceremonies including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Demos, Story Grooming, and Release Planning
- Coaching and mentoring about scrum in the team
- Assist in defining and deploying new product development processes and in facilitating the continuous improvement of existing processes
- Pro-active, creative participation in project execution, translating business needs into technology solutions through analysis
- Demonstrating excellence in **Technical Research and Analysis** - researching and investigating problems, conducting diagnose, and providing resolution or viable solutions for hardware and software issues; appropriately escalating and reporting recommendations clearly and effectively to management and team
- Imparting the understanding of product planning in an empirical environment,
- Ensuring that the Product Owner has clarity on arranging the product backlog to yield maximized value,
- Understanding and practicing agility and
- Facilitating Scrum events as requested or needed.
- Coaching Scrum practices and principles.
- Configure Jira for various organizational needs e.g. create projects, set permissions
- Add and onboard new users
- Support organization and users e.g. troubleshooting raised issues

Key Result Areas:

Scrum Master

- *Managed scrum teams and acted as a facilitator to ensure that all tasks and milestone dates are met on time and on budget with high quality.*
- *Performing the role of Scrum Master - conducting daily stand-up, fixing impediments, sprint planning meetings, sprint review meetings, and retrospective meetings, facilitating Demo, Release Plan, Hardening Sprint and Sprint Shutdown etc.*
- *Driving organizational agility through agile values, principles, and practices for software delivery by working with the executive, mid-senior management, and development teams.*
- *Involved in the end-to-end implementation of tools to support projects executed in Scrum Methodology.*
- *Monitoring the sprint's progress, proactively identifying the impediments, and removing the blockers accordingly.*

Technical Development

- *Analyzing the project requirements.*
- *Involving in Coding various layers like Controllers, Services, DAO-Spring-Data, Validators.*
- *Fixing Bug reported at various stages by debugging the project.*
- *Creating Jenkins pipelines for production deployment and giving the Jenkins builds and deployment*
- *Experience in writing code coverage for Microservices using Junit, Mockito*
- *Monitoring application in Splunk*
- *Involved in peer review*

ACADEMIC CREDENTIALS

- **MCA (master's in computer application)** from RTMNU, Nagpur University; 2011

CAREER CONTOUR

Jan 23 to Current, as Scrum Master at **GalaxE Solutions, Pune, India**

Jul 21-Dec 23, as Scrum Master & Technical Lead with **FIS Global, Pune, India**

Dec 19 – Jun 21, Scrum Master & Technical Lead with **Tech Mahindra, Pune, India**

Nov 19 - Jan 17, Sr. Software Developer with **Tech Mahindra, Pune, India**

Jan 11 – Dec 16, Sr. Software Developer with **Zensar Technologies**

TECHNICAL FORTE

Well-versed with the following technical areas of expertise entailing:

- Operating Systems: Windows and Linux
- Databases: Oracle, MSSQL, Postgres, DB2
- SRM Tool: BMC REMEDY 7/8, Service NOW, JIRA, Rally
- Monitoring Tool: Splunk, Kibana, New Relic
- Languages/Technologies: JAVA, JSP, SERVELET, Spring BOOT MICROSERVICES, HIBERNATE, SQL/PLSQL
- Web Services: SOAP & REST
- Development Tools: Eclipse, IntelliJ, PGADMIN
- Web Application server: Apache, TOMCAT, WebLogic
- Versioning Tools: CVS, SVN, GIT
- CI/CD TOOL: Jenkins
- Messaging Queue: Rabbit MQ, KAFKA

PROJECT ACCOMPLISHED

Championed success in the attainment of multiple projects throughout the tenure:

Project: ACCESS RULES

Type: Development

Platform: Windows

Software: JAVA, SPRINGBOOT, KAFKA, POSTGRES, DB2, NEW RELIC, SPLUNK, KANBAN, JIRA

Client: CIGNA

Duration: 1.5 Years [Jan 2023 – Current]

Role: Scrum Master & Developer

Responsibilities:

Scrum Master:

- Organize and facilitate daily stand-up meetings, reviews, retrospectives, sprint and release planning, demos, and other Scrum-related meetings.
- Track and communicate team velocity and sprint/release progress to Higher Management.
- Provide visibility to team impediments/risks and help eliminate them.
- Encouraging the team to self-organization team members and providing constructive performance feedback

- Identify and remove impediments and prevent distractions that interfere with the ability of the team to deliver the sprint goal.
- Facilitate discussion and conflict resolution and empower the teams to self-organize.
- Helped the product owners to come up with a set of stories for a better understanding for prioritizing, estimating, development, task splitting, and allocation.
- Motivated the team to come up with quality shippable products and meet the product goals.
- Representing the team to report overall project status and upcoming risks and suggest solutions to it.
- Maintain process documentation and share the reports on a timely basis.
- Update agile tracking systems to provide transparency on Product & Sprint Backlogs.
- Assist the team with making appropriate commitments through story selection, and task definition.

Developer:

- Analyzing the project requirements and Involved in Coding various layers like Controllers, Services, DAO-Spring-Data, Validators if needed
- Worked on Jenkins pipelines for deployment and helped team in log monitoring on Splunk in case needed
- Fixing Bug reported at various stages by debugging the project And Involved in Peer Reviews

Project: Worldpay Gateway
Type: Development
Platform: Windows
Software/Tools/Database: JAVA, Spring boot, Oracle, Splunk, Jenkins, Git, Rally, KANBAN, JIRA
Client: Worldpay
Duration: 1.5 years (July 2021 to Dec 2022)
Role: Scrum Master & Developer

Responsibilities as Scrum Master

- Coach team members. The Scrum master makes sure that team members are well-trained and understand Agile processes.
- Host daily stand-up meetings.
- Assist the product owner with the product backlog.
- Remove roadblocks.
- Formulating techniques for effective Product Backlog Management,
- Helping the team understand the need for clear and concise product backlog items,
- Imparting the understanding of product planning in an empirical environment,
- Ensuring that the Product Owner has clarity on arranging the product backlog to yield maximized value,
- Understanding and practicing agility, and
- Facilitating Scrum events as requested or needed.
- Teach Scrum practices and principles.

Developer:

- Analyzing the project requirements and Involved in Development
- Involved in Peer Reviews
- Involved in project deployment and log monitoring

Project: Vodafone Ziggo
Type: Development
Platform: Windows
Software/Tools/Database: JAVA, Spring boot, Oracle, Splunk, Jenkins, Git, Rally, KANBAN, JIRA
Client: eCOM GLOBAL
Duration: 1.5 years (Dec 2019 to Jun 2021)
Role: Project Lead & Scrum Master

Responsibilities as Scrum Master

- Host daily stand-up meetings.
- Assist the product owner with the product backlog.
- Remove roadblocks.
- Teach Scrum practices and principles.
- Imparting the understanding of product planning in an empirical environment,
- Ensuring that the Product Owner has clarity on arranging the product backlog to yield maximized value,

Understanding and practicing agility, and

- Facilitating Scrum events as requested or needed.
- Teach Scrum practices and principles.

Technical:

- Involved in understanding and analyzing the business requirements
- Provided technical solutions to the requirements
- Involving in Coding various layers like Controllers, Services, DAO-Spring-Data, Validators.
- Experienced in using POSTMAN for RESTful Web services/REST API for testing.
- Experience in writing code coverage for Microservices and using Junit, Mockito
- Experience in using Docker Container and messaging queue like RabbitMQ
- Fixing Bug reported at various stages by debugging the project.
- Monitoring applications in Kibana.
- Part of daily stand-up meetings to discuss estimations, daily tasks, deadlines and improvements.

Project: **BT_PPR_CLASSIC**
Type: Development
Software/Tools/Database: JAVA, SQL
Client: British Telecom
Duration: 1.6 years (Jan 2018 to Nov 2019)
Role: Software Developer

Responsibilities:

- Involved in understanding and analyzing the business requirements
- Provided technical solutions to the requirements
- Involved in client suggested enhancement development in java
- Working as end-to-end developer

Project: **Mobius 2.0**
Type: Development
Software/Tools/Database: Java, Camunda
Client: AT&T
Duration: 1 year (Jan 2017 to Dec 2017)
Role: Software Developer

Responsibilities:

- Involved in understanding and analyzing the business requirements
- Provided technical solutions to the requirements
- Involved in creation of BPMN and DMN for process flows
- Working on the java at backend

Project: **Alfresco- SE and ML**
Type: Development
Software/Tools/Database: Java, Remedy8.0, JavaScript, jQuery, Rally, ITIL
Client: CISCO
Duration: 1 year (Dec 2016 to Dec 2017)
Role: Domain Expert

Responsibilities:

- Involved in understanding and analyzing the business requirements
- Provided technical solutions to the requirements
- Involved in creation of support processes
- Involved in creation of test plans
- Working as analyst, SME, QA analyst
- Working on automation for various backend features
- Working on Rally for QA functionalities

Project: **PSP**
Type: Development
Software/Tools/Database: Perl, SQL Server.
Client: CISCO
Duration - 8 Months (April 2016 to Dec 2016)
Role: Developer, SME

Responsibilities:

- Requirement Analysis and Validation
- Designing of Software Design Documents.
- Involved in the implementation phase for developing the various modules.
- Involved in design and architecture of the application.
- Participated in regular requirement and status calls with client.
- Involved in unit testing.
- Preparation of unit test scenarios and unit test cases
- Status reporting to onsite team on behalf of entire team

Project:	GDM- Global Desktop Management
Type:	Development
Software/Tools/Database:	Oracle, Spring, Hibernate.
Client:	CISCO
Duration:	1 year (April 2015 to March 2016)
Role:	Developer as well as SME (Subject Matter Expert)

Responsibilities:

- Involved in understanding and analyzing the business requirements
- Provided technical solutions to the requirements
- Monitoring the Scheduled jobs
- Troubleshoot on Scheduled Jobs
- Daily monitoring the logs of an application
- Daily Sanity Testing
- Work on JIRA ticket for enhancement in Plsql as well as java code.
- Participation in weekly business status calls.
- Work on remedy cases as SME and provided the necessary support according to client's request.
- Involved in decommissioning process for GDM application

Project:	Frontgate Enhancement and Support
Type:	Development
Software/Tools/Database:	Core JAVA, Servlets, JSP, jQuery, Eclipse, HTML, AJAX, Hibernate, Oracle, Toad, Remedy SRM tool
Client:	CISCO
Duration:	3 years (Mar 2012 to March 2015)
Role:	Developer as well as SME (Subject Matter Expert)

Responsibilities:

- Involved in understanding and analyzing the business requirements
- Provided technical solutions to the requirements
- Involved in the implementation phase for developing the Servlets classes and jsp's.
- Monitoring the Scheduled jobs
- Troubleshoot on Scheduled Jobs
- Daily monitoring the logs of an application
- Daily Sanity Testing
- Work on JIRA ticket for enhancement in code.
- Involved in design and architecture of the application.
- Participation in weekly business status calls.
- Involved in the KT session to the new resources about functionality and high-level architecture
- Work on remedy cases as SME and provided the necessary support according to client's request.

Project:	WIKI and JIRA Support
Type:	Development
Software/Tools/Database:	Servlets, JSP, SQL Server 2005, Eclipse
Client:	CISCO - ALFRESCO
Duration:	1.7 Years (Jan 2011 to Sep 2012)
Support:	Using Markup language
Role:	Developer as well as SME (Subject Matter Expert)

Responsibilities:

- Responsible for understanding and analyzing the application requirements.
 - Provided support according to client request
 - Developed a module for JIRA project deletion
-
