

Shwetha Kumar

Excel in a challenging IT role, leveraging technical expertise to optimize business functionality and drive organizational growth. Targeting opportunities to leverage .NET development skills and contribute to the success of a dynamic organization.

PROFILE SUMMARY

- **Demonstrating 2 years of extensive IT experience** as a .Net developer specializing in the pharmaceutical and healthcare domain.
- Currently serving as a .Net Developer at DSG, now as Signant Biotech, Bangalore contributing to the RTSM (Clinical Trail Domain) project.
- Proficient in .NET Core, C#, SQL Server, HTML and JavaScript functionality, with a strong understanding of web API development.
- Acknowledged for fostering effective team communication and displaying proactive initiative in streamlining work processes.
- Proficient in developing and implementing repository pattern and dependency injection for scalable and maintainable .NET applications, enhancing overall code quality and performance.
- Achieved a significant reduction in production defects on high priority by implementing efficient business logic for web applications, resulting in improved project delivery timelines and client satisfaction.

WORK EXPERIENCE

Signant Biotech | .Net Developer | JUN 2022–MARCH 2024

Client: AstraZeneca

Responsibilities:

- Spearheading the development of business logic for web applications using ASP.NET Core and C#, ensuring seamless functionality aligned with project requirements.
- Collaborating within an Agile/Scrum environment, actively participating in scrum meetings, and effectively communicating with business analysts, project managers, and testers to understand detailed business requirements.
- Designing and developing components for Business and Data Layer architecture, resolving production defects on high priority, and maintaining good communication with global team members.
- Leading the API development using .NET Core with LINQ queries, working on SQL Server, and effectively utilizing Jira Board and Team Foundation Server.
- Orchestrated the integration of Kendo Controls UI for web applications, enhancing user experience and streamlining data visualization, leading to positive feedback from end-users and stakeholders.

Achievements:

- Proactively reduced functional workload, resulting in positive feedback from clients and seniors at Signant Health.

SkillSpeed | Research and Content Developer | June 2015 – Oct 2015

Grain Technologies | Research Associate | April 2014 – Nov 2014

Worked for Educational Technical Publications.

Achievement:

- Demonstrated proactive behavior in reducing functional workload, leading to positive feedback from clients at SkillSpeed.

CERTIFICATIONS

Certified in Python Programming Course from Besant Technologies, Bangalore.

Certified in Cloud Infrastructure Services (CIS) course (2013) from EMC.
