

Work History

Android Developer

XYUG Technologies Pvt. Ltd, Hyderabad, India | June 2023 - Current

App Link: [goldbox](#)

- Developed Gold Box Application:** Created e-commerce app for buying, selling, and trading 22k gold jewelry, incorporating features such as installment plans and gold schemes.
Tech Stack: Java, Android SDK, Firebase
- Integrated Payment Gateways:** Implemented payment solutions including Razorpay and PhonePe for secure transactions, allowing users to manage their purchases and track payment history.
Tech Stack: Razorpay, PhonePe APIs, Firebase
- Enhanced User Experience:** Enabled users to monitor transactions and bids through a digital wallet, providing a comprehensive overview of their gold-related activities.
Tech Stack: Java, Firebase, Google Wallet
- Integrating audio, video, and camera functionalities:** Implemented real-time video recording, playback, and audio capture, optimizing for device performance. Integrated camera features with custom controls and filters, enhancing user engagement.
Tech Stack: Java, Android SDK, CameraX
- Implemented Store Location Detection:** Incorporated location-based features to help users find stores, enhancing functionality and accessibility.
Tech Stack: Google Maps API, Firebase

Associate Software Engineer

Harman Connected Services, Bengaluru, India | March 2022 - July 2023

- Designed, developed, and tested Android applications using Java and Android Studio, including custom user interfaces for both tablets and mobile phones.
Tech Stack: Java, Android Studio, XML
- Conducted testing on both Android emulators and physical devices, ensuring high performance and reliability.
Tech Stack: Android Emulators, Physical Devices
- Integrated third-party libraries such as Picasso and APIs to enhance functionality and user experience.
Tech Stack: Picasso, Retrofit
- Implemented UI/UX improvements, resolved bugs, and optimized performance, including development of music player apps.
Tech Stack: Java, Android SDK

Projects

- Smart Connected Gym (Mirror Application) :** Allows users to log in, sign up, and receive smart recommendations based on daily data. Features equipment maps, exercise guidance, and slot booking options.
- Smart Connected Gym (Admin Application):** A digital system replacing traditional gym processes. Admins can manage equipment, and track gym and user metrics using Core Java, REST API, and Postman.
- AgroMart:** A platform addressing farming efficiency issues by allowing farmers to interact and choose from machinery options to meet their needs.

Sindhu Kasturi
