

Nunna Sirisha

Security Analyst

sirishanunna9801@gmail.com | 9550416341

Objective

Security Analyst/ Security Engineer with **3+ years** of relevant experience in the field of Information Security. Worked and managed projects related to IT Security, SIEM. To associate with an innovative and vibrant organization, allowing me to put my competencies to the best use, to add value to the organization and contribute to my overall growth as an individual.

Summary

- I am currently working in the Security Analyst team (Customer Success) for clients.
- Working in Security Operation Center (24x7), monitoring SOC events, detecting and preventing Intrusion attempts.
- Interacting with clients/ application owners and understanding security requirements specific to their application.
- Onboarding log sources to SIEM (Security tools, Custom tools, SaaS applications, On premise managed applications, Cloud applications)
- Creating DSM's, extracting custom properties, parsing incoming data from log different log sources.
- Creating processes or procedures for SOC operations and guiding L1 SOC resources.
- Managing and deploying all SOC-SIEM enrichment processes.
- Acting as the initial POC for customers for any security related issues/ questions.
- Regular interaction with clients, updating them regarding different security issues in the infrastructure with daily, weekly or monthly reports and providing possible solutions to remediate and further security risk.
- Advising security solutions to clients to keep their infrastructure Compliant as per InfoSec policies.
- Updating customers with the latest security trends and threat advisories.
- Creating DSM's, extracting custom properties, parsing incoming data from log different log Sources.
- Creating Security Alerts, Reports, Dashboards, lookups, managing and integrating new log sources in SIEM.
- Maintain data and monitor security access
- Analyze security breaches to determine their root cause.
- Anticipate security alerts, incidents and disasters and reduce their likelihood.
- Coordinate security plans with outside vendors/ Clients.
- Perform Cyber and Technical Threat analysis.
- Decision making/ escalation on triggered alerts.
- Correlation rule creation and fine-tuning on SIEM.
- Dashboard creation on SIEM.

Work Experience

MICROLAND (Security Analyst)

11/2021 – Current | Bangalore

Payroll: ILI Technologies Limited (Bangalore)

Roles and Responsibilities:

- Working in Security Operation Center (24x7), monitoring SOC events, detecting and preventing Intrusion attempts.

- Good understanding of security solutions like Firewalls (Palo Alto, checkpoint, Fortinet) DLP, Anti-virus, IPS, Email Security etc.
- Monitor SIEM alerts, analyze events in SIEM and raise Security incidents in Ticketing tool Manage Engine.
- Monitoring packet level data Intrusion Detection and Intrusion Prevention and Network Security Products (IDS/IPS, firewalls, etc.) Host Security Products (HIPS, AV, scanners, etc.).
- Responding to various security alerts for various client and scanning for vulnerabilities using tools like Qualys.
- Monitoring real-time events using SEIM tools like Splunk.
- Handling Alerts from multiple Security Log sources such as Proxy, Anti-Virus and EDR. Deep dive Investigation through Falcon EDR.
- Monitoring, analyzing, and responding to infrastructure threats and vulnerabilities. Phishing and Spam Email Analysis.
- Investigate the security logs, mitigation strategies and responsible for preparing generic security incident reports.
- Having excellent knowledge of Intrusion Detection (deep TCP/IP knowledge, and Cyber security), various operating systems (Windows/UNIX), and web technologies (focusing on Internet security).
- Monitoring packet level data Intrusion Detection and Intrusion Prevention and Network Security Products (IDS/IPS, firewalls, etc.) Host Security Products (HIPS, AV, scanners, etc.).
- Creating a case for the suspicious issue and forwarding it to Onsite SOC team for further investigation. Website Anti Malware and Defacement monitoring and real-time alerting based on anomalies detected.
- Responsible for preparing the Root Cause Analysis (RCA) reports based on the analysis. Analyzing daily, weekly, and monthly reports.
- Experience in Monitoring h Investigating the incoming Events in the MacAfee DLP.
- Monitoring security systems and networks for anomalies.
- Investigating security violations, attempts to gain unauthorized access, virus infections, etc. Coordinate responses to security incidents in a timely manner.
- Conduct real-time monitoring and analysis of Azure Active Directory (AAD) logs to detect and investigate potential security threats.
- Identify and respond to suspicious logins, compromised accounts, and abnormal behavior within Azure AD, utilizing advanced threat detection tools.
- Lead and coordinate incident response efforts related to Azure AD, including triage, containment, and remediation of security incidents.
- Manage user and privileged identities, including lifecycle management, to prevent unauthorized access and enforce least-privilege access.
- Work with various teams across the organization to improve security posture.

Technical Skills

- **Tools:** SIEM (Splunk, IBM Qradar and Microsoft Sentinel)
- **Phishing Email Analysis –** O365 Defender and Proofpoint, Knowbe4
- **Ticketing Tool:** Service Now and JIRA
- **Vulnerability Management:** Nessus
- **EDR:** Falcon Crowd strike, Symantec
- **DLP** (Force point, Symantec)
- **IDS, IPS, DLP, WAF, AWS**
- **Malware Analysis, Threat Intelligence**
- **Other Tools:** Azure Active Directory, Entra ID and Protection, Offices Defender Cloud, Logic Apps, O365, EDR and XDR

Education

BSC from Dr Lankapalli Bullayaa college (Andhra University) in 2021.

Declaration

I Here declare that the above given information is correct to the best of my knowledge and belief.
