- Assigning, Solving T1, T2 tickets, Daily jobs scheduling and monitoring.
- Responsible for monitoring and maintaining all mainframe systems.

Project Name	Insurance Policy Revival Management System.
Client	Brad Ford National Life Insurance Co., USA
Organization	Wipro
Technology	COBOL, JCL, DB-2, VSAM
Duration	July-2022 – Dec-2023
Environment	JCL, COBOL, DB-2, VSAM, ca7, Endeavor

Project Description:

Bradford National Life Insurance Co. is one of the leading insurance providers in USA. Previously BFNL was offering three types of revival schemes, namely Pay-Back Revival Scheme, Revival under Loan Scheme, and survival benefit cum-revival scheme. The new Revival schemes are SRS (Special Revival Scheme) and IRS (Installment Revival scheme).

In case of SRS, the new policy will be issued in which the policy start date is advanced so as to make the last paid premium date as the current date. Fine and service charges are calculated based on the date of last paid premium and new premium amount is calculated and the service charges to be collected will be distributed in the premium of the next two years.

In case of IRS, the fine or service charges are calculated based on the date of last paid premium. In case of monthly paid premium 6 months premiums will be collected at the time of revival and the remaining service charges and the due premium amount to be paid would be distributed evenly with the premium of the next two years.

As a Team Member, actively involved in the following areas.

ROLES & RESPONSIBILITIES:

- In analysis of Specifications provided by the Client.
- Coding the program as per Coding standards.
- Involving Involved in Unit Testing with different test cases with the test data prepared.
- Involved in coding, design, analysis and moving to prod as per code delivery.
- Involved in analyzing programs according to change requests.
- Involved in designing low level design documents.
